Because I Promised:

Claiming a Promised Inheritance Alexandra Braun, 2022 This book examines those cases where a person is promised a future inheritance and having acted on it later discovers that the promise is unfulfilled It structures its analysis and argument around the stories of disappointed promisees and their unfulfilled expectations of a future inheritance and how they might seek redress It maps and compares the various and often very diverse range of legal responses that a promisee can avail herself of across different legal areas of the law ranging from contract law to property law employment law unjust and unjustified enrichment law and succession law and in both common and civil law traditions It asks how these responses protect the interests of promisees and whether they are sensitive to the context in which such promises are expressed In doing so the focus rests on the level of protection the various forms of redress grant their scope and the challenges promisees face when bringing a claim but also on the values and interests that are at stake when granting relief This book argues that due to the social and legal context within which promises of a future inheritance are normally made promisees are usually in a vulnerable position that can easily be exploited It further argues that the law is usually more acutely attuned to the risks that the promisor incurs and that greater attention should be paid to the challenges promisees face This book thus complements the traditional viewpoint by bringing into focus the too often ignored perspective of promisees **A**

Reasonableness and Responsibility: A Theory of Contract Law Martín Hevia, 2012-09-14 If as John Rawls famously suggests justice is the first virtue of social institutions how are we to understand the institution of contract law This book proposes a Rawlsian theory of contract law It argues that justice requires that we understand contract rules in terms of the idea of reasonable terms of interaction that is terms that would be accepted by reasonable persons moved by a desire for a social world in which they as free and equal can cooperate with others on terms they accept On that basis the book explains the main doctrines of contract law including those governing third parties in both the Common Law and the Civil Law

The Enforceability of Promises in European Contract Law James Gordley, 2001-07-12 Civil law and common law systems are held to enforce promises differently civil law in principle will enforce any promise while common law will enforce only those with consideration In that respect modern civil law supposedly differs from the Roman law from which it descended where a promise was enforced depending on the type of contract the parties had made This 2001 volume is concerned with the extent to which these characterizations are true and how these and other differences affect the enforceability of promises Beginning with a concise history of these distinctions the volume then considers how twelve European legal systems would deal with fifteen concrete situations Finally a comparative section considers why legal systems enforce certain promises and not others and what promises should be enforced This is the second completed project of The Common Core of European Private Law launched at the University of Trento Hand-book of the Law of Bills and Notes Charles Phelps Norton, 1896
