Inventing the Feeble Mind James Trent, 2016-11-01 Inventing the Feeble Mind explores the history of intellectual disability from its several identifications in the United States over the past 200 years idiocy imbecility feeble-mindedness mental deficiency and defectiveness mental retardation and most recently intellectual disability

The Unteachables Keith A. Mayes, 2023-01-24 How special education used disability labels to marginalize Black students in public schools The Unteachables examines the overrepresentation of Black students in special education over the course of the twentieth century As African American children integrated predominantly white schools many were disproportionately

labeled educable mentally retarded EMR learning disabled LD and emotionally behavioral disordered EBD Keith A Mayes charts the evolution of disability categories and how these labels kept Black learners segregated in American classrooms The civil rights and the educational disability rights movements Mayes shows have both collaborated and worked at cross purposes since the beginning of school desegregation Disability rights advocates built upon the opportunity provided by the civil rights movement to make claims about student invisibility at the level of intellectual and cognitive disabilities Although special education ostensibly included children from all racial groups educational disability rights advocates focused on the needs of white disabled students while school systems used disability discourses to malign and marginalize Black students From the 1940s to the present social science researchers policymakers school administrators and teachers have each contributed to the overrepresentation of Black students in special education Excavating the deep seated racism embedded in both the public school system and public policy The Unteachables explores the discriminatory labeling of Black students and how it indelibly contributed to special education disproportionality to student discipline and push out practices and to the school to prison pipeline effect

Doing Disability Justice Larry A. Jones, 2010 75 years of the trials and triumphs of families advocating for people with intellectual and other disabilities

Civil Disabilities Nancy J. Hirschmann, Beth Linker, 2015-02-25 An estimated one billion people around the globe live with a disability this number grows exponentially when family members friends and care providers are included Various countries and international organizations have attempted to guard against discrimination and secure basic human rights for those whose lives are affected by disability Yet despite such attempts many disabled persons in the United States and throughout the world still face exclusion from full citizenship and membership in their respective societies They are regularly denied employment housing health care access to buildings and the right to move freely in public spaces At base such discrimination reflects a tacit yet pervasive assumption that disabled persons do not belong in society Civil Disabilities challenges such norms and practices urging a reconceptualization of disability and citizenship to secure a rightful place for disabled persons in society Essays from leading scholars in a diversity of fields offer critical perspectives on current citizenship studies which still largely assume an ableist world Placing historians in conversation with anthropologists sociologists with literary critics and musicologists with political scientists this interdisciplinary volume presents a compelling case for reimagining citizenship that is more consistent inclusive and just in both theory and practice By placing disability front and center in academic and civic discourse Civil Disabilities tests the very notion of citizenship and transforms our understanding of disability and belonging Contributors Emily Abel Douglas C Baynton Susan Burch Allison C Carey Faye Ginsburg Nancy J Hirschmann Hannah Joyner Catherine Kudlick Beth Linker Alex Lubet Rayna Rapp Susan Schweik Tobin Siebers Lorella Terzi

The Autism Matrix Gil Eyal, 2013-08-26 Today autism has become highly visible Once you begin to look for it you realize it is everywhere Why We all know the answer or think we do there is an autism epidemic And if it is an epidemic then we know what must be done lots of

money must be thrown at it detection centers must be established and explanations sought so that the number of new cases can be brought down and the epidemic brought under control But can it really be so simple This major new book offers a very different interpretation The authors argue that the recent rise in autism should be understood an aftershock of the real earthquake which was the deinstitutionalization of mental retardation in the mid 1970s This entailed a radical transformation not only of the institutional matrix for dealing with developmental disorders of childhood but also of the cultural lens through which we view them It opened up a space for viewing and treating childhood disorders as neither mental illness nor mental retardation neither curable nor incurable but somewhere in between The authors show that where deinstitutionalization went the furthest as in Scandinavia UK and the blue states of the US autism rates are also highest Where it was absent or delayed as in France autism rates are low Combining a historical narrative with international comparison The Autism Matrix offers a fresh and powerful analysis of a condition that affects many parents and children today
