Michael Hall, Stefan Gössling, 2016-05-26 Food tourism is a topic of increasing importance for many destinations Seen as a means to potentially attract tourists and differentiate destinations and attractions by means of the association with particular products and cuisines food is also regarded as an opportunity to generate added value from tourism through local agricultural systems and supply chains and the local food system From a regional development perspective this book goes beyond culinary tourism to also look at some of the ways in which the interrelationships between food and tourism contribute to the economic environmental and social wellbeing of destinations communities and producers It examines the way in which tourism and food can mutually add value for each other from the
