Stollorz, 2008-07-03 Ancient calendars found around the world are designed to end one point in time They communicate an urgent warning to everyone alive today Complex bronze and gold clocks with multiple dials are found in museums around the world Why they have such advanced intricacy has stumped scientists for hundreds of years This book reveals why the ancients built so many pyramids observatories as well as those complex gold and bronze clocks with more than one dial It surprised me greatly to discover that their various complex designs in one way or another converge on 21 December 2012 It amazes me that ancient cultures separated by thousands of miles of geography and thousands of years in chronology agree so precisely in the cyclical nature of time history and prophecy which is history written in advance The most famous example is the Mayan Aztec calendar which ends its 25 626 year cycle on that momentous date Some researchers have also found 21 December 2012 in what is called the Bible Code Using very different research methods I discovered it in the Bible s book of Revelation and Daniel s prophecies It is one of the most important dates in the plan of God for all humanity Astrology through History William E. Burns, 2018-07-20 Alphabetically arranged entries cover the history of astrology from ancient Mesopotamia to the 21st century In addition to surveying the Western tradition the book explores Islamic Indian East Asian and Mesoamerican astrology The field of astrology is growing rapidly as historians recognize its centrality to the intellectual life of the past and sociologists and anthropologists treat its importance in a number of modern cultures Despite the historical and cultural significance of the subject most reference works on astrology focus on

instructional techniques and are written by astrologers with little or no interest in the history of the topic This book instead offers an objective treatment of astrology across world history from ancient Mesopotamia to the present The book provides alphabetically arranged entries by expert contributors writing on such topics as horoscopes court astrologers Renaissance astrology and comets While it considers the Western tradition it also treats Islamic Indian East Asian and Mesoamerican astrology In doing so it explores the role of astrology in shaping science literature religion art and other defining cultural traditions Sidebars offer excerpts from various historical texts while entries provide suggestions for further reading
