At The Hand Of Man Peril And Hope For Africas Wildlife:

At the Hand of Man Raymond Bonner, 2013-02-20 Defying conventional wisdom even as it makes an impassioned plea for moral common sense this book by an award winning journalist sheds a new light on the history and politics of the African conservation movement The book will anger and inspire anyone who cares about African wildlife and the people whose future is intertwined with the fate of these animals

Private Wildlife Conservation in Zimbabwe Harry Wels, 2021-11-08 This book is the first about private wildlife conservation and community involvement in Zimbabwe It is a case study based on ethnographic fieldwork done in 1998 It focuses on the joint venture between a private wildlife conservation initiative the Save Valley Conservancy and its surrounding communities in terms of reciprocal exchange and the land question It makes clear amongst other things that the current political tragedy in Zimbabwe about land did not start when Mugabe lost the referendum in February 2000 The book tries to offer an explanation for the unforgiving route that Mugabe has obviously taken in the land question despite his words of reconciliation when he came to power in 1980 This book is of particular interest to students practitioners and academics in the fields of private wildlife conservation community participation and organisational co operation

Ivory Keith Somerville, 2017-01-01 Half of Tanzania s elephants have been killed for their ivory since 2007 A similar alarming story can be told of the herds in northern

Mozambique and across swathes of central Africa with forest elephants losing almost two thirds of their numbers to the tusk trade The huge rise in poaching and ivory smuggling in the new millennium has destroyed the hope that the 1989 ivory trade ban had capped poaching and would lead to a long term fall in demand But why the new upsurge The answer is not simple Since ancient times large scale killing of elephants for their tusks has been driven by demand outside Africa s elephant ranges from the Egyptian pharaohs through Imperial Rome and industrialising Europe and North America to the new wealthy business class of China And who poaches and why do they do it In recent years lurid press reports have blamed mass poaching on rebel movements and armed militias especially Somalia s Al Shabaab tying two together two evils poaching and terrorism But does this account stand up to scrutiny This new and ground breaking examination of the history and politics of ivory in Africa forensically examines why poaching happens in Africa and why it is corruption crime and politics rather than insurgency that we should worry about

Sponsoring Nature Maano Ramutsindela, Marja Spierenburg, Harry Wels, 2013-11-05 Saving the world s flora and fauna especially high profile examples such as chimpanzees whales and the tropical rain forests is big business Individuals and companies channel their resources to the preservation of nature through various ways one of which is the funding of environmental non governmental organizations ENGOs and community based organizations CBOs This book is the first to comprehensively address this issue and focus on a dominant theme in environmental philanthropy the links between ENGOs and CBOs and their sponsors especially the private sector It has been argued that donor support is based on recipient s perceived expertise and needs with no favouritism of flagship environmental organizations as recipients of donor funds A counterview holds that the private sector prefers to fund mainstream ENGOs for environmental research and policy reforms congenial to industrial capital The authors show that the debate about these arguments together with the empirical evidence on which they are based may shed light on certain aspects of the nature of environmental philanthropy The book evaluates practical examples of environmental philanthropy from Africa and elsewhere against philosophical questions about the material and geographical expressions of philanthropy and the North South connections among philanthropists and ENGOs and CBOs

Nature Crime Rosaleen Duffy, 2010-08-31 The perilous state of endangered species such as tigers and rhinos and the worldwide illegal trade in ivory diamonds bushmeat and many other rare and valuable commodities are familiar issues in the West The heroes in these narratives are those who work to create protected areas for wildlife the villains the shadowy poachers and smugglers who destroy endangered animals and their habitats for the sake of profit In this groundbreaking book Rosaleen Duffy argues that the story is much more complex than this She analyses the workings of the black market wildlife industry pointing out that illegal trading is often the direct result of Western consumer desires from coltan for mobile phones to caviar for the global elite She looks at how tourists contribute often unwittingly to the destruction of natural environments Most strikingly she argues that the imperatives of Western style conservation often result in serious injustice to local people who are at risk of losing not only

heir land but sometimes even their lives The result of many years of first hand research this book is essential reading for anyone who wants to understand the complex realities of nature conservation Jacket
