Athenian Stuart Pioneer Of The Greek Revival:

Athenian Stuart David Watkin, 1982 *Was James 'Athenian' Stuart a Pioneer of the Greek Revival?* , 2007 The Athenian Institution of the Khoregia Peter Wilson, 2003-09-18 The first major study of a central cultural institution of classical Athens History of Architectural Theory Hanno-Walter Kruft, 1994 As the first comprehensive encyclopedic survey of Western architectural theory from Vitruvius to the present this book is an essential resource for architects students teachers historians and theorists Using only original sources Kruft has undertaken the monumental task of researching organizing and analyzing the significant statements put forth by architectural theorists over the last two thousand years The result is a text that is authoritative and complete easy to read without being reductive **Kinaesthesia and Classical Antiquity**

1750-1820 Helen Slaney, 2020-09-03 This book argues that touch and movement played a significant role long overlooked in generating perceptions of ancient material culture in the late 18th century At this time the reception of classical antiquity had been transformed Interactions with material culture ruins sculpture and artefacts formed the core of this transformation Some such interactions were proto archaeological such as the Dilettanti expeditions to Athens and Asa Minor others were touristic seen in the guidebooks consulted by travellers to Rome and the diaries they composed and others creative resulting in novels poetry and dance performances Some involved the reproduction of experience in a gallery or museum setting What all encounters with ancient material culture had in common however is their haptic sensory basis The sense typically associated with the Enlightenment is vision but this has obscured the equally important contribution made by touch and movement to the way in which a newly materialised Graeco Roman world was perceived Kinaesthesia or the sense of self movement is rarely recognised in its own right but because all encounters with sites and objects are embodied and all embodiment takes place in motion this sense is vital to forming more abstract or imaginative impressions Theories of embodied cognition propose that all intellectual processes are also physical This book shows how ideas about classical antiquity in the volatile milieu of the late 18th century developed as a result of diverse kinaesthetic relationships

Humanism and History Joseph M. Levine, 2019-05-15 In this thoughtful and engaging book Joseph M Levine reveals how Renaissance humanists and their neoclassical progeny transformed the ways that the English practices history and viewed the past Between 1500 and 1800 many of the methods of modern historiography were first introduced into England where they developed under the influence of classical philology and the study of antiquities English scholars gradually differentiated past from present and successfully detected and recovered the ancient Roman Saxon Celtic and Norman cultures A first attempt was also made to distinguish historical fact from fiction and such legends as the Trojan origins of Britain and the Donation of Constantine were rejected Levine sets the scene for these developments with an examination of the historical outlook of William Caxton at the end of the Middle Ages he concludes with an essay on Edward Gibbon whose work three centuries later he argues summarizes the whole achievement of early modern historiography Along the way Levine

investigates such topics as the transformation the antiquarian enterprise into modern archaeology the quarrel between the ancients and the moderns the Gothic revival and the influence of humanism on Francis Bacon and the new philosophy

The Rediscovery of Antiquity Jane Fejfer, Tobias Fischer-Hansen, Annette Rathje, 2003 Classical Archaeologists art historians and artists consider the Role of the Artist in the rediscovery of the past **'Turquerie' and the Politics of Representation, 1728-1876** Nebahat Avcioglu, 2011 Devoted explicitly to the examination of Ottoman Turkish inspired architecture in Western Europe during the eighteenth and nineteenth centuries in this study Nebahat Avcioglu rethinks the question of cultural frontiers not as separations but as a rapport of heterogeneities Reclaiming turquerie as cross cultural art from the confines of the inconsequential exoticism it is often reduced to Avcioglu analyses hitherto neglected constructions and links them to notions of self representation and politics *Antiquity on Display* Can Bilsel, 2012-07-19 Antiquity on Display offers an insight into the history of the imaginative reproductions of architecture housed in Berlin s Pergamon Museum and the shifting regimes of the authentic in museum displays from the 19th century to the present The Hero Building Johnny Rodger, 2016-03-09 Why was it that across Scotland over the last two and a half centuries architectural monuments were raised to national heroes Were hero buildings commissioned as manifestations of certain social beliefs or as a built environmental form of social advocacy And if so then how and why were social aims and intentions translated into architectural form and how effective were they A tradition of building architectural monuments to commemorate national heroes developed as a distinctive feature of the Scottish built environment As concrete manifestations of powerful social and political currents of thought and opinion these hero buildings make important statements about identity the nation and social history The book examines this architectural culture by studying a prominent selection of buildings such as the Burns monuments in Alloway Edinburgh and Kilmarnock the Edinburgh Scott Monument the Glenfinnan Monument and the Wallace Monument in Stirling They give testimony to how a variety of architectural forms and styles can be adapted through time to bear particular social messages of symbolic weight This tradition which literally allows us to dwell on important social issues of the past has been somewhat neglected in serious architectural history and heritage and indeed one of the main monuments has already been destroyed By raising awareness of this rich architectural and social heritage while analysing and interpreting the buildings in their historical context this book makes an exciting and original scholarly contribution to the current debates on identity and nationality taking place in Scotland and the wider UK
