Broadsides Of The Industrial North:

Broadsides of the Industrial North Martha Vicinus, 1975 **Industrial Gothic** Bridget M. Marshall, 2021-06-15
Transatlantic approach This project explores British and American texts in conversation together Use of archival materials which is relatively unusual within Gothic studies and even in literary studies more generally A focus on poetry drama and periodical writing genres that are often ignored in the study of the Gothic A focus on women's work both on the labor of women and on texts by women A focus on local Gothic especially in Lowell and Manchester with a connection to larger international trends of the genre **Education in Britain, 1750-1914** W B Stephens, 1999-01-18 This concise study covers the development of education throughout Great Britain from the Industrial Revolution to the Great War a period in which urbanization industrialization and population growth posed huge social and political problems and education became one of the fiercest areas of conflict in society **Loyalism and Radicalism in Lancashire, 1798-1815** Katrina Navickas, 2009-01-15 Loyalism and Radicalism in Lancashire 1798 1815 is a lively and detailed account of popular politics in Lancashire during the later years of the French Revolution and during the Napoleonic wars Drawing on a wide variety of sources such as letters diaries and broadside ballads it offers fresh insights into the complicated dynamics between radicalism loyalism and patriotism and emphasises Lancashire's distinctive political culture and its place at the heart of the industrial revolution This region witnessed some of the most intense disruptive and violent popular politics in this period and beyond Highly active and vocal groups emerged extreme republicans more moderate radicals Luddites early trade unionists and also strong networks of Church and King loyalists and Orange lodges Katrina Navickas explains how this heady mix created a politically charged region where both local and national affairs played their part She follows the inner workings of popular political activity in response to both internal and external threats including loyalist processions and civic events volunteer corps formed as defence against invasion food riots strikes by trade unions and both secret and public meetings on the key issues of peace and parliamentary reform Navickas argues for a distinct sense of regional identity that shaped not only local politics but also patriotism Lancastrians felt British in the face of the French but it was a particularly Lancastrian type of Britishness **The Politics of Songs in Eighteenth-Century Britain, 1723-1795** Kate Horgan, 2015-10-06 Horgan analyses the importance of songs in British eighteenth century culture with specific reference to their political meaning Using an interdisciplinary methodology combining the perspectives of literary studies and cultural history the utilitarian power of songs emerges across four major case studies The Victorian City Harold James Dyos, Michael Wolff, 1999 Victorian City is a study of the social and intellectual attitudes of Victorian society to the challenge of urbanization **Manhood in Early Modern England** Elizabeth A Foyster, 2014-09-25 This is the first book to focus on the relationships which men formed with their wives in early modern England making it an important contribution to a new understanding of English social family and gender history Dr Foyster redresses the balance of historical research which has

largely concentrated on the public lives of prominent men The book looks at youth and courtship before marriage male fears of their wives gossip and sexual betrayal and male friendships before and after marriage Highlighted throughout is the importance of sexual reputation Based on both legal records and fictional sources this is a fascinating insight into the personal lives of ordinary men and women in early modern England Street Ballads in Nineteenth-Century Britain, Ireland, and North America David Atkinson, Steve Roud, 2016-04-01 In recent years the assumption that traditional songs originated from a primarily oral tradition has been challenged by research into street literature that is the cheap printed broadsides and chapbooks that poured from the presses of jobbing printers from the late sixteenth century until the beginning of the twentieth Not only are some traditional singers known to have learned songs from printed sources but most of the songs were composed by professional writers and reached the populace in printed form Street Ballads in Nineteenth Century Britain Ireland and North America engages with the long running debate over the origin of traditional songs by examining street literature s interaction with and influence on oral traditions Love among the Poets Pearl Chaozon Bauer, Erik Gray, 2024-04-16 British literature of the Victorian period has always been celebrated for the quality innovativeness and sheer profusion of its love poetry Every major Victorian poet produced notable poems about love This includes not only canonical figures such as Alfred Lord Tennyson Robert and Elizabeth Barrett Browning and Christina Rossetti but also lesser known poets whose works have only recently become widely recognized and studied such as Augusta Webster and the many often anonymous working class poets whose verses filled the pages of popular periodicals Modern critics have claimed convincingly that love poetry is not just one strain of Victorian poetry among many it is arguably its representative even definitive mode This collection of essays reconsiders the Victorian poetry of love and just as importantly of intimacy a more inclusive term that comprehends not only romance but love for family for God for animals and for language itself Together the essays seek to define a poetics of intimacy that arose during the Victorian period and that continues today a set of poetic structures and strategies by which poets can represent and encode feelings of love There exist many studies of intimate relations especially marriage in Victorian novels But although poetry rivals the novel in the depth and diversity of its treatment of love marriage and intimacy that aspect of Victorian verse has remained underexamined Love among the Poets offers an expansive critical overview With its slate of distinguished contributors including scholars from the US Canada Britain and Australia the volume is a wide ranging account of this vital era of poetry and of its importance for the way we continue to write love and live today **Writing British Infanticide** Jennifer Thorn, 2003 Writing British Infanticide tracks the ways that the circulation of narratives of child murder in eighteenth and nineteenth century Britain shaped perceptions and punishments of the crime and more elusively hierarchies of class and gender The essays brought together in this volume pose the question How are we to understand the proliferation of writing about child murder in eighteenth and nineteenth century Britain the overlap of an expanding print culture with the widely evident narration of this

particular crime Further what are we to make of the recurrent and remarkably consistent representation of child murder as the special province of unmarried desperate women Focussing on specific instances of the transformative effect of the circulation of narratives of child murder Writing British Infanticide takes as its purview not child murder per se but the ways that writing about it credentialed and differentiated writers in different but often overlapping genres and moments in a key period in the expansion of print Jennifer Thorn is an Assistant Professor of English at Duke University
