

THE BROKEN CONNECTION

ON DEATH AND THE CONTINUITY OF LIFE

THE BROKEN CONNECTION is a collection of essays by Robert Jay Lifton, a leading authority on the psychology of the nuclear age. In this book, Lifton explores the profound impact of nuclear war on the human psyche, and how it has led to a breakdown in the connection between life and death. He argues that the threat of nuclear annihilation has led to a new form of nihilism, one that denies the value of life and the possibility of a meaningful future. Lifton's work is a powerful critique of the nuclear age and a call for a new way of thinking about life and death.

Death, Mourning, and the Afterlife in Korea Charlotte Horlyck, Michael J. Pettid, 2018-02-28 Death and the activities and beliefs surrounding it can teach us much about the ideals and cultures of the living While biologically death is an end to physical life this break is not quite so apparent in its mental and spiritual aspects Indeed the influence of the dead over the living is sometimes much greater than before death This volume takes a multidisciplinary approach in an effort to provide a fuller understanding of both historic and contemporary practices linked with death in Korea Contributors from Korea and the West incorporate the approaches of archaeology history literature religion and anthropology in addressing a number of topics organized around issues of the body disposal of remains ancestor worship and rites and the afterlife The first two chapters explore the ways in which bodies of the dying and the dead were dealt with from the Greater Silla Kingdom 668-935 to the mid twentieth century Grave construction and goods cemeteries and memorial monuments in the Koryŏ 1392 and the twentieth century are then discussed followed by a consideration of ancestral rites and worship which have formed an inseparable part of Korean mortuary customs since premodern times Chapters address the need to appease the dead both in shamanic and Confucian contexts The final section of the book examines the treatment of the dead and how the state of death has been perceived Ghost stories provide important insight into how death was interpreted by common people in the Koryŏ and Chosŏn 1392-1910 while nonconformist narratives of death such as the seventeenth century romantic novel *Kuunmong* point to a clear conflict between Buddhist thought and practice and official Neo-Confucian doctrine Keeping with unendorsed views on death the final chapter explores how death and the afterlife were understood by early Korean Catholics of the eighteenth and nineteenth centuries *Death Mourning and the Afterlife in Korea* fills a significant gap in studies on Korean society and culture as well as on East Asian mortuary practices By approaching its topic from a variety of disciplines and extending its historical reach to cover both premodern and modern Korea it is an important resource for scholars and students in a variety of fields

The Death of Herod Richard K. Fenn, 1992-07-31 This 1992 work is intended to be a taster to sociological method for students of the New Testament Richard Fenn demonstrates how fruitful the relationship between the social sciences and biblical studies can be when sociological method is imaginatively applied to the New Testament Fenn s point of departure is the particular historical event of the death of Herod the Great He focuses on Josephus account of the trials of Herod s sons the death of Herod himself and the crisis of succession which followed his death Josephus account is shown to provide a rich sociological resource in that he observes how speech was used to conceal rather than to convey individuals true interests and commitments His account also reveals the failure of the trial as a critically important institution for restoring confidence in public discourse The result the author argues is the intensification of conflict within and between generations at every level of Palestinian society

The Politics of Being Mortal Alfred G. Killilea, 2021-09-15 While much has been written in recent years on death and dying there has been little treatment of how people cope with death in the absence of religious belief and virtually no examination of the potential political repercussions of a wider acceptance of

mortality in American society Alfred Killilea's strikingly original book revolves around a central irony though the subject of death has been largely shunned in American culture lest it rob life of meaning and contentment confronting death may be crucial to enable us as individuals and as a society to affirm life even to survive in this nuclear age Killilea argues that the denial of death has fostered a disavowal of limits in general and that a greater awareness of our mortality would provide a much needed catalyst for change in our political response to narcissism and nuclearism He traces how from John Locke to the present a politics and an economics based on growth for the sake of growth have required an avoidance of human vulnerability Our confrontation with mortality Killilea argues would goad us to question our roles as mere acquirers and to take more seriously the need for equality and community in our society In charting how we can come to terms with death and how profoundly our attitudes toward death affect our attitudes toward politics Killilea writes lucid and authoritative commentaries on such provocative thinkers as Earnest Becker Robert Jay Lifton Michael Novak Daniel Bell Christopher Lasch and Jonathan Schell Scholars in many fields as well as interested lay readers will find the treatment of these issues and thinkers compelling This easily accessible book is an urgent reminder that the most valuable spur to the examined life extolled by Socrates is the knowledge that we will die

Earthly Immortalities Peter Moore, 2019-06-15 In this thought provoking book Peter Moore examines the often overlooked issues concerning human mortality the fragile ways in which the dead can be said to live on in earthly terms through their children their work the memories of others their possessions and even their bodies Such earthly immortalities raise a host of fascinating questions about our attitudes toward life and toward the world we leave behind us when we die To what extent does the meaning we find in our lives depend upon the assumption there will always be a new generation to continue the human adventure What would it be like if science were able to extend life indefinitely and is this something already enshrined in the doctrine of reincarnation Can we solve our anxieties about mortality by learning that life is worth living precisely because we do not live forever In a generous and eloquent account these and more are the questions *Earthly Immortalities* seeks to answer

Death, Bereavement, and Mourning Samuel C. Heilman, 2018-02-06 An encounter with the death of another is often an occasion when the bereaved need to be sustained in their loss relieved of the anxiety that the meeting with death engenders and comforted in their grief It is a time when those left behind often seek to redress wrongs in themselves or in the relationships that death has shaken and upset In both collective and individual responses to the trauma of encountering death we witness efforts to counter the misfortune and to explain the meaning of the loss to turn memory into blessing to reconcile life with death to regenerate life and redeem both the bereaved and the dead Sometimes loss may transform the bereaved in ways that lead to growth and maturity other times a loss leads to unrelenting anger or melancholia There may be a variety of spiritual expressions that the bereaved experience in their time of loss but there appears to be some common elements in all of them Overtime survivors feelings are transformed into growing exploration of the spiritual a profound sense of rebirth newfound feelings of self mastery or

confidence and a deeply held conviction that life goes on The contributions to this volume are based on a conference held in New York on the first anniversary of September 11 2001 Contributors include Peter Metcalf Robert Jay Lifton Ilana Harlow Robert A Neimeyer Samuel Heilman and Neil Gillman This sensitive and heartfelt volume relates specifically to issues of death bereavement and mourning in the aftermath of the attack on the World Trade Center but the applications to other individual and catastrophic events is obvious The contributions do not simply explore how people deal with bereavement or are psychologically affected by extreme grief they address how people can try to find meaning in tragedy and loss and strive to help restore order in the wake of chaos The multidisciplinary perspectives include those of anthropology psychology theology social work and art
