**Bronze Age Maritime and Warrior Dynamics in Island East Asia** Mark Hudson, 2022-07-07 Recent interdisciplinary studies combining scientific techniques such as ancient DNA analysis with humanistic re evaluations of the transcultural value of bronze have presented archaeologists with a fresh view of the Bronze Age in Europe The new research emphasises long distance connectivities and political decentralisation Bronzisation is discussed as a type of proto globalisation In this Element Mark Hudson examines whether these approaches can also be applied to East Asia Focusing primarily on Island East Asia he analyses trade maritime interactions and warrior culture in a comparative Eurasian framework He argues that the international division of labour associated with Bronze Age trade provided an important stimulus to the rise of decentralised complexity in regions peripheral to alluvial states Building on James Scott's work the concept of the barbarian niche is proposed as a way to model the longue durée of premodern Eurasian history This title is also available as open access on Cambridge Core      **Art of the Bronze Age in Southeast Asia** Martin Doustar, 2014      *The Oxford Handbook of Early Southeast Asia* Charles Higham, Nam C. Kim, 2022 This handbook collects expert surveys of the prehistory of Southeast Asia a two millennial span that began with the arrival of now extinct humans and ended with the great civilization of Angkor 9th to 15th century      *Interpreting Southeast Asia's Past* Peter Sharrock, Ian C. Glover, Elizabeth A. Bacus, 2008-01-01 Interpreting Southeast Asia's Past Monument Image and Text features 31 papers read at the 10th International Conference of the European Association of Southeast Asian Archaeologists held in London in September 2004 The volume covers monumental arts sculpture and painting epigraphy and heritage management across mainland Southeast Asia and as far south as Indonesia New research on monumental arts includes chapters on the Bayon of Angkor and the great brick temple sites of Champa There is an article discussing the purpose of making and erecting sacred sculptures in the ancient world and accounts of research on the sacred art of Burma Thailand and southern China including the first study of the few surviving Saiva images in Burma of a spectacular find of bronze Mahayana Buddhas and of the sculpted bronzes of the Dian culture New research on craft goods and crafting techniques deals with ancient Khmer materials including recently discovered ceramic kiln sites the sandstone sources of major Khmer sculptures and the rare remaining traces of paint plaster and stucco on stone and brick buildings More widely distributed goods also receive attention including Southeast Asian glass beads and there are contributions on Southeast Asian heritage and conservation including research on Angkor as a living World Heritage site and discussion of a UNESCO project on the stone jars of the Plain of Jars in Laos that combines recording safeguarding bomb clearance and eco tourism development      **Uncovering Southeast Asia's Past** European Association of Southeast Asian Archaeologists. International Conference, 2006 The 36 chapters in this collection have been selected to give an overview of recent research into prehistoric and early historic archaeology in Southeast Asia In the first chapter Her Royal

Highness Princess Maha Chakri Sirindhorn of Thailand comments on the significance of the inscriptions from the important Khmer temple Prasat Phnom Rung in northeastern Thailand Following this Professor Charles Higham gives an original and insightful survey of the prehistoric threads linking south China and the countries of modern Southeast Asia **Globalizing the Prehistory of Japan** Ann Kumar, 2008-11-24 This iconoclastic work on the prehistory of Japan and of South East Asia challenges entrenched views on the origins of Japanese society and identity The social changes that took place in Japan in the time period when the Jomon culture was replaced by the Yayoi culture were of exceptional magnitude going far beyond those of the so called Neolithic Revolution in other parts of the world They included not only a new way of life based on wet rice agriculture but also the introduction of metalworking in both bronze and iron and furthermore a new architecture functionally and ritually linked to rice cultivation a new religion and a hierarchical society characterized by a belief in the divinity of the ruler Because of its immense and enduring impact the Yayoi period has generally been seen as the very foundation of Japanese civilization and identity In contrast to the common assumption that all the Yayoi innovations came from China and Korea this work combines exciting new scientific evidence from such different fields as rice genetics DNA and historical linguistics to show that the major elements of Yayoi civilization actually came not from the north but from the south *Ban Chiang, Northeast Thailand, Volume 2A* Joyce C. White, Elizabeth G. Hamilton, 2018-11-09 The emergence and adoption of metallurgy is one of the seminal topics of investigation in the history of archaeology particularly in the history of archaeological research in Southeast Asia The site of Ban Chiang Thailand is a central site in debates surrounding the chronology and significance of early metallurgy in the region This book is the first in a series of four volumes that review the contributions of Ban Chiang and three related sites in northeast Thailand excavated by the Penn Museum to an understanding early metallurgy in Thailand As the study of archaeometallurgy is a complex topic that draws on numerous technical and social science disciplines this introductory volume presents in several chapters the background needed to assess the metal and related evidence presented in the subsequent volumes in this series A history of perspectives on the role of metals in ancient societies generally and Southeast Asia specifically is provided Other chapters debunk the conventional paradigm for understanding metals and society and provide current theoretical perspectives and new paradigms for the study of ancient metals The geological basis for the presence and location of metal ore resources in the region is reviewed The final chapter presents a technical overview of ways material properties of ancient metals may be studied While providing a background to the study of metals at Ban Chiang the volume also reviews synthesizes and repositions the method and theory for the study of archaeometallurgy generally Thai Archaeology Monograph Series 2A University Museum Monograph 149 The ^AOxford Handbook of Early Southeast Asia C.F.W. Higham, Nam C. Kim, 2022-01-11 This handbook collects expert surveys of the prehistory of Southeast Asia a two millennial span that began with the arrival of now extinct humans and ended with the great civilization of Angkor 9th to 15th century
