Short Novels of the Masters Charles Neider, 2001-06-26 Ten classic short novels appear in this collection by noted editor Neider The contents include Benito Cereno by Herman Melville Notes from Underground by F M Dostoyevsky A Simple Heart by Gustave Flaubert The Death of Ivan Ilych by L N Tolstoy The Aspern Papers by Henry James Ward No 6 by A P Chekhov Death in Venice by Thomas Mann The Dead by James Joyce recently made into a musical The Metamorphosis by Franz Kafka and The Fox by D H Lawrence In the introduction Neider discusses the themes that arise in several of the novels grouping them by more than just their greatness

Wind, Fire, and Ice Robert M. Bunes, 2021-10-01 Between 1955 and 1987 the United States Coast Guard Cutter Glacier was the largest and most powerful icebreaker in the free world Consequently it was often given the most difficult and dangerous Antarctic missions This is the dramatic first person account of its most legendary voyage In 1970 the author was the Chief Medical Officer on the Glacier when it became trapped deep in the Weddell Sea pressured by 100 miles of wind blown icepack Glacier was beset within seventy miles of where Sir Ernest Shackleton's ship the Endurance was imprisoned in 1915 His stout wooden ship succumbed to the crushing pressure of the infamous Weddell Sea pack ice and sank leading to an unbelievable two year saga of hardship heroism and survival The sailors aboard the Glacier feared they would suffer Shackleton's fate or one even worse Freakishly good luck eventually saved the Glacier from destruction in the crushing ice pack only to experience a three hour

fire that nearly killed one of the crew followed by eighty foot waves that came close to capsizing the ship Wind Fire and Ice is a story about a physician who starts out with a set of false assumptions namely that he is going have an easy assignment and see numerous exotic ports but then slowly comes to realize a much different hard reality Early American Naturalists John Moring,2005-03-25 This history is the first to detail the lives adventures and discoveries of pioneering American naturalists such as Meriwether Lewis and William Clark Martha Maxwell Spencer Baird Asa Gray John Torrey Florence bailey John Burroughs and John Muir From discovering new Edge of the World ,2001-11-13 Writer and explorer Charles Neider made his first trip to Antarctica in 1969 achieving a lifelong goal of seeing the frozen continent with his own eyes During this visit and a return trip in 1970 both backed by the U S Navy and the National Science Foundation Neider discovered the rigor and beauty of life so close to the South Pole In addition to his own experiences Edge of the World also contains Neider s accounts of Shackleton s and Scott s expeditions and the story of his own helicopter crash and rescue on the slopes of Mt Erebus Neider s account is erudite literate and intensely personal Inhospitable World Jennifer Fay,2018-03-01 In recent years environmental and human rights advocates have suggested that we have entered the first new geological epoch since the end of the ice age the Anthropocene In this new epoch humans have come to reshape unwittingly both the climate and natural world humankind has caused mass extinctions of plant and animal species polluted the oceans and irreversibly altered the atmosphere Ironically our efforts to make the planet more hospitable to ourselves seem to be driving us toward our inevitable extinction A force of nature humanity is now decentered as the agent of history As Jennifer Fay argues this new situation is to geological science what cinema has always been to human culture Film like the Anthropocene is a product of the industrial revolution but arises out of a desire to preserve life and master time and space It also calls for the creation of artificial worlds unnatural weather and deadly environments for entertainment scientific study and devising military strategy Filmmaking stages quite literally the process by which worlds and weather come into being and meaning and it mimics the forces that are driving this new planetary inhospitality Cinema in other words provides an image of nature in the age of its mechanical reproducibility Fay argues that cinema exemplifies the philosophical political and perhaps even logistical processes by which we can adapt to these forces and also imagine a world without humans in it Whereas standard ecological criticism attends to the environmental crisis as an unraveling of our natural state this book looks to film from Buster Keaton to Jia Zhangke to films of atomic testing and early polar exploration to consider how it reflects upon the creation and destruction of human environments What are the implications of ecological inhospitality What role might cinema and media theory play in challenging our presumed right to occupy and populate the world As an art form film enjoys a unique relationship to the material elemental world it captures and produces Through it we may appreciate the ambitions to design an unhomely planet that may no longer accommodate us
