Between Time And Terror:

Cities in a Time of Terror: Space, Territory, and Local Resilience H.V. Savitch, 2014-12-18 This book is about urban terror its meaning its ramifications and its impact on city life Written by a well known expert in the field Cities in a Time of Terror draws on data from more than a thousand cities across the globe and traces the evolution of urban terrorism between 1968 and 2006 It explains what kinds of cities have become prime targets why terrorism has become increasingly lethal and how its inspiration has changed from secular to religious The author describes urban terrorism as an attempt to use the city s own strength against itself forcing it to implode and delineates three basic logics of terrorist choices for targeting cities The book also includes a discussion of local resilience the city s capacity to bounce back from attack and suggests how that can be sustained Examples from New York London Jerusalem Istanbul Moscow Paris and Madrid illustrate the book s central themes

Between Time and Terror Robert Weinberg, Stefan R. Dziemianowicz, Martin Harry Greenberg, 1995 Collection of stories that combine science speculation and horror

Terrorism and Temporality in the Works of Thomas Pynchon and Don DeLillo James Gourley, 2013-06-06 Terrorism and Temporality in the Works of Thomas Pynchon and Don DeLillo starts from a simple premise that the events of the 11th of September 2001 must have had a major effect on two New York residents and two of the seminal authors of American letters Pynchon and DeLillo By examining implicit and explicit allusion to these events in their work it becomes apparent that both consider 9 11 a crucial event and that it has profoundly impacted their work From this important point the volume focuses on the major change identifiable in both authors work a change in the perception and conception of time This is not however a simple change after 2001 It allows at the same time a re examination of both authors work and the acknowledgment of time as a crucial concept to both authors throughout their careers Engaging with several theories of time and their reiteration and examination in both authors work this volume contributes both to the understanding of literary time and to the work of Pynchon and DeLillo

The Politics of Terror Erica Chenoweth, Pauline L. Moore, 2018 Bringing together both classic and contemporary research The Politics of Terror provides a systematic introduction to the theory politics and practice of terrorism The text is framed around a set of empirical theoretical and methodological puzzles that arise in the study of terrorism challenging students to think critically about key issues in the field

Trust and Terror Ammar Shamaileh, 2017-04-21 Why do some individuals choose to protest political grievances via non violent means while others take up arms What role does whom we trust play in how we collectively act This book explores these questions by delving into the relationship between interpersonal trust and the nature of the political movements that individuals choose to join Utilizing the examples of the Arab Spring uprisings in Egypt Libya and Syria a novel theoretical model that links the literature on social capital and interpersonal trust to violent collective action is developed and extended Beyond simply bringing together two lines of literature this theoretical model can serve as a prism from which the decision to join terrorist organizations or violent movements may be analyzed The implications of the theory

are then examined more closely through an in depth look at the behavior of members of political movements at the outset of the Arab Spring as well as statistical tests of the relationship between interpersonal trust and terrorism in the Middle East and globally Trust and Terror will be of interest to scholars of Comparative Politics and International Relations The Open Access version of this book available at <https://doi.org/10.4324/9781315505817> has been made available under a Creative Commons Attribution Non Commercial No Derivatives 4.0 license

The Metaphysics of Terror Rasmus Ugilt, 2014-03-13 This groundbreaking study aims to provide a philosophical analysis of the phenomenon of terror in particular the political reactions to it such as public anxiety and pre-emptive wars and to re-articulate the understanding of metaphysics through a consideration of its political implications The book reveals that the key feature of terror is potentiality that is terror is always about what could happen as opposed to what is likely to happen This notion helps broaden the scope of the investigation as the argument spans the ontology political psychology political cosmology and political theology of terror Each chapter begins with an empirical discussion examining such topics as the political practices in reaction to terror the politics of fear warfare sovereignty and the debates about the state of exception in relations to anti-terrorism laws This unique examination of our political reality uncovers the axiom of terrorism namely its potentiality Going beyond the scope of terrorism studies it explains the philosophical underpinnings of terror without compromising on the empirical facts drawn from policymaking jurisprudence and related fields

Coalitions Between Terrorist Organizations Ely Karmon, 2005-06-01 This volume proposes some theories on the conditions that favor the formation of coalitions between terrorist organizations and how they function within the changing international system These theories are tested against empirical data on actual cooperation between European and Palestinian terrorist organizations from 1968 to 1990 and cooperation between European left wing terrorist organizations the phenomenon known as Euro terrorism from 1984 to 1988 These findings form the basis of a broader theory concerning cooperation and coalitions between organizations involved in international terrorism Finally an attempt is made to verify whether the new terrorist players driven at least theoretically by religious motivation will imitate the behavior of the ideological or nationalist organizations and to test whether the theories concerning cooperation and coalitions developed in this volume apply to the new reality

The Invention of Terrorism in Europe, Russia, and the United States Carola Dietze, 2021-07-27 Terrorism's roots in Western Europe and the USA This book examines key cases of terrorist violence to show that the invention of terrorism was linked to the birth of modernity in Europe Russia and the United States rather than to Tsarist despotism in 19th century Russia or to Islam sects in Medieval Persia Combining a highly readable historical narrative with analysis of larger issues in social and political history the author argues that the dissemination of news about terrorist violence was at the core of a strategy that aimed for political impact on rulers as well as the general public Dietze's lucid account also reveals how the spread of knowledge about terrorist acts was from the outset a transatlantic process Two incidents form the book's centerpiece The first is the failed attempt to assassinate French Emperor

Napoli on III by Felice Orsini in 1858 in an act intended to achieve Italian unity and democracy The second case study offers a new reading of John Brown's raid on the arsenal at Harpers Ferry in 1859 as a decisive moment in the abolitionist struggle and occurrences leading to the American Civil War Three further examples from Germany Russia and the US are scrutinized to trace the development of the tactic by first imitators With their acts of violence the invention of terrorism was completed Terrorism has existed as a tactic since then and has essentially only been adapted through the use of new technologies and methods

Cultural Experiences of Fear, Horror and Terror Mark Callaghan, Kacey Davis, 2019-01-04 This volume was first published by Inter Disciplinary Press in 2016 This volume comprises numerous academic papers concerning essential subjects in relation to fear horror and terror from cinematic representations and their subsequent responses to first person accounts of terror by way of literature and journalism Key scholars are employed to develop these important research areas as they provide new insights into cultural experiences and evaluations of fear horror and terror and their consequent analysis Contributors also explore cross cultural fear the memorialisation of violence and female experiences of fear represented through literature theatre and cinema Valuable research is also demonstrated by way of the conceptualisation and management of fear including the control of public fear in relation to mental illness along with significant insights concerning depictions of sexual violence the concept of the sublime in relation to the visualisation of the universe and the relationship between scales of fright and the bulk of the on screen monster

Truth and Revolution in Marx's Critique of Society Matthias Bohlender, Anna-Sophie Schönfelder, Matthias Spekker, 2023-01-31 This book deals with a central aspect of Marx's critique of society that is usually not examined further since it is taken as a matter of course its scientific claim of being true But what concept of truth underlies his way of reasoning which attempts to comprehend the social and political circumstances in terms of the possibility of their practical upheaval In three studies focusing specifically on the development of Marx's scientific critique of capitalist society his journalistic commentaries on European politics and his reflections on the organisation of revolutionary subjectivity the authors carve out the immanent relation between the scientifically substantiated claim to truth and the revolutionary perspective in Marx's writings They argue that Marx does not grasp the world as it is but conceives it as an inverted state which cannot remain what it is but generates the means by which it can eventually be overcome This is not something to be taken lightly Such a concept has theoretical political and even violent consequences consequences that nevertheless derive neither from a subjective error nor a contamination of an otherwise pure science By analyzing Marx's concept of truth the authors also attempt to shed light on a pivotal problematic of any modern critique of society that raises a reasoned claim of being true
