Greenslade**

Beyond Conception The New Politics Of Reproduction:

Beyond Conception Patricia Spallone,1989 *Beyond Conception* is a feminist critique of the new reproductive and genetic technologies whose impact has been most apparent since the birth of the first test tube baby The author finds that these technologies are not created in women s interest Instead they require the subordination of women to science

Reproducing the Womb Alice Elaine Adams,1994 Alice E Adams crafts a subtle new response to the controversies surrounding reproductive freedom and the implications of medical technology She explores a spectrum of competing visions of childbearing from misogynistic nightmares of matriarchal control to feminist utopias Firmly rooted in political reality Adams offers innovative answers to the questions posed by the intimate interconnections and the perceived conflicts between fetus and mother individual and collective

The Politics of Motherhood Alexis Jetter,Annelise Orleck,Diana Taylor,1997 Essays and interviews explode the myth of apolitical motherhood by showing how 20th century women have politicized their role as mothers in a wide range of social contexts

Beyond Pro-life and Pro-choice Fran Amery,2020-01-22 Examining the changing pluralities of contemporary abortion debate in Britain this innovative and important book shows why it is necessary to move beyond an understanding of abortion politics as characterised in binary terms by pro choice versus pro life Amery traces the evolution of political and parliamentary discourses from the passage of the Abortion Act in the 1960s to the present day and argues that the current provision of abortion in Britain rests on assumptions about medical authority over women s reproductive decision making which are unsustainable She explores new arguments around sex selective abortion disability rights pre abortion counselling and the push for decriminalization and radically reconceptualizes the debate to account for these new battlegrounds in abortion politics

New Genetics, New Social Formations Peter Glasner,Paul Atkinson,Helen Greenslade,2006-12-15 New genetic technologies cut across a range of public regulatory domains and private lifeworlds often appearing to generate an institutional void in response to the complex challenges they pose As a result a number of new social formations are being developed to legitimate public engagement and avoid the perceived democratic deficit that may result Papers in this volume discuss a variety of these manifestations in a global context including genetic data banks committees of inquiry non governmental organisations NGOs national research laboratories These institutions across both health and agriculture are explored in such diverse locations as Amazonia China Finland Israel the UK and the USA This volume exhibits a clear thematic coherence around the impact of the new genetics and their associated technologies on new social formations and the case studies included have a significant international focus showing a balance between theoretical and empirical approaches in this rapidly changing field This innovative new volume will be of interest to postgraduates and professionals in the fields of sociology social anthropology science and technology studies and environmental studies

Biological Relatives Sarah Franklin,2013-11-15 Sarah Franklin explores the history and future of in vitro fertilization IVF thirty five years and five million babies after its initial success as a form of technologically assisted

 This benchmark collection of cross cultural essays on reproduction and childbirth extends and enriches the work of Brigitte Jordan who helped generate and define the field of the anthropology of birth The authors focus on authoritative knowledge the knowledge that counts on the basis of which decisions are made and actions taken highlights the vast differences between birthing systems that give authority of knowing to women and their communities and those that invest it in experts and machines Childbirth and Authoritative Knowledge offers first hand ethnographic research conducted by anthropologists in sixteen different societies and cultures and includes the interdisciplinary perspectives of a social psychologist a sociologist an epidemiologist a staff member of the World Health Organization and a community midwife Exciting directions for further research as well as pressing needs for policy guidance emerge from these illuminating explorations of authoritative knowledge about birth This book is certain to follow Jordan s Birth in Four Cultures as the definitive volume in a rapidly expanding field This title is part of UC Press s Voices Revived program which commemorates University of California Press s mission to seek out and cultivate the brightest minds and give them voice reach and impact Drawing on a backlist dating to 1893 Voices Revived makes high quality peer reviewed scholarship accessible once again using print on demand technology This title was originally published in 1999 This benchmark collection of cross cultural essays on reproduction and childbirth extends and enriches the work of Brigitte Jordan who helped generate and define the field of the anthropology of birth The authors focus on authoritative knowledge the kn

Genes and the Bioimaginary Deborah Lynn Steinberg, 2016-03-03
 Genes and the Bioimaginary examines the dramatic rise and contemporary cultural apotheosis of the gene The book traces not only the genetification of modern life but is also a journey through the complex relationship between science and culture At the heart of this book are three interlinked questions The first concerns the paradigmatic transformations of the genetics revolution how can we understand the impact of genes on social arenas as diverse as law and agriculture politics and medicine genealogy and jurisprudence Second how has the language of genes come to pervade public discourse as much a trope of personal narrative as of the popular imaginary And third how can we gain critical purchase not only on the conditions and consequences of a particular science but on its projective seductions the terms of its persuasion and the dilemmas and anxieties provoked in its wake Through a series of illuminating case studies ranging from gay genes to Jew genes to genes for crime from CSI to the Innocence Project from genetics post racial imaginary to its phantasies of redemption the book examines the emergence of the gene as a pre eminent locus of both scientific and social explanation and as a powerful object of spectacle projective phantasy and attachment Genes and the Bioimaginary makes a distinctive contribution to our understanding of how knowledge comes to be not only powerful but plausible
