National Aeronautics and Space Administration, 1982 **Dreams of Other Worlds** Chris Impey, Holly Henry, 2016-04-19 The story of unmanned space exploration from Viking to today Dreams of Other Worlds describes the unmanned space missions that have opened new windows on distant worlds Spanning four decades of dramatic advances in astronomy and planetary science this book tells the story of eleven iconic exploratory missions and how they have fundamentally transformed our scientific and cultural perspectives on the universe and our place in it The journey begins with the Viking and Mars Exploration Rover missions to Mars which paint a startling picture of a planet at the cusp of habitability It then moves into the realm of the gas giants with the Voyager probes and Cassini s ongoing exploration of the moons of Saturn The Stardust probe s dramatic round trip encounter with a comet is brought vividly to life as are the SOHO and Hipparcos missions to study the Sun and Milky Way This stunningly illustrated book also explores how our view of the universe has been brought into sharp focus by NASA s great observatories Spitzer Chandra and Hubble and how the WMAP mission has provided rare glimpses of the dawn of creation Dreams of Other Worlds reveals how these unmanned exploratory missions have redefined what it means to be the temporary tenants of a small planet in a vast cosmos *Astronautics, 1966-1975* United States Air Force Academy. Library, Robert S. Shaffer, 1976 **Greetings, Carbon-Based Bipeds!** Arthur C. Clarke, 2001-01-06 In the definitive work of his brilliant career Clarke has collected his most prophetic nonfiction essays lucidly demonstrating that he not only anticipated many of the 20th century s greatest scientific innovations but he in fact helped to shape the path to come 16 page photo insert Heritage Rare Books & Manuscripts Auction Final Session # 683 , **Lost Mars** Mike Ashley, 2018-10-19 A thoroughly enjoyable collection of stories imagining the Red Planet during the golden age of science fiction from an award winning anthologist Kirkus Reviews An antique shop owner gets a glimpse of the Red Planet through an intriguing artifact A Martian s wife contemplates the possibility of life on Earth A resident of Venus describes his travels across the two alien planets From an arid desert to an advanced society far superior to Earth s portrayals of Mars have differed radically in their attempts to uncover the truth about our neighboring planet Since the 1880s after an astronomer described channels on its surface writers have speculated endlessly on what life on Mars might look like and what might happen should we make contact with its inhabitants This collection offers ten wildly imaginative stories by famed authors like H G Wells Ray Bradbury and J G Ballard as well as hard to find selections by unjustly forgotten writers of the genre Introduced by acclaimed anthologist Mike Ashley they vividly evoke a time when notions of life on other planets from vegetation and water to space invaders and utopian societies were new and startling As we continue to imagine landing people on Mars these stories represent gripping and vivid dispatches from futurists past A superlative set of stories Vibrant and powerful Locus These stories are of the highest quality and illustrate how our evolving understanding of the Red Planet changed the way we wrote

about it and how Mars came to occupy a prominent position in our hopes dreams and fears as the modern age dawned and grew

Arthur C. Clarke Gary Westfahl, 2018-06-14 Already renowned for his science fiction and scientific nonfiction Arthur C Clarke became the world s most famous science fiction writer after the success of 2001 A Space Odyssey He then produced novels like Rendezvous with Rama and The Fountains of Paradise that many regard as his finest works Gary Westfahl closely examines Clarke s remarkable career ranging from his forgotten juvenilia to the passages he completed for a final novel The Last Theorem As Westfahl explains Clarke s science fiction offered original perspectives on subjects like new inventions space travel humanity s destiny alien encounters the undersea world and religion While not inclined to mysticism Clarke necessarily employed mystical language to describe the fantastic achievements of advanced aliens and future humans Westfahl also contradicts the common perception that Clarke s characters were bland and underdeveloped arguing that these reticent solitary individuals who avoid conventional relationships represent his most significant prediction of the future as they embody the increasingly common lifestyle of people in the twenty first century
