Beyond Tech Fixes Christo El Morr, Yahya El-Lahib, Rachel da Silveria Gorma, 2025-09-30 This book offers a bold and critical examination of the intersections between artificial intelligence AI and disability justice Rather than framing AI as a neutral or purely beneficial tool the book interrogates how AI systems reproduce ableism deepen systemic exclusions and perpetuate colonial neoliberal and corporate power structures It challenges the prevailing reliance on tech fixes improving datasets or tweaking algorithms and instead insists on addressing the deeper social political and ethical dimensions of AI development and deployment Through a disability justice lens it highlights the complex realities faced by disabled communities and emphasizes the need for approaches that dismantle ableism rather than superficially enhance accessibility Covering topics such as algorithmic bias data colonialism technoableism and the militarization of AI this book foregrounds critical frameworks including design justice data sovereignty and participatory governance It draws on diverse scholarly perspectives and activist insights to propose actionable pathways toward more accountable equitable and inclusive AI futures By centering disabled people's experiences and knowledge the book offers not only critique but also visionary strategies for transforming AI systems to serve justice rather than entrench oppression

Beyond ADHD Jeff Emmerson, Robert Yehling, 2017-08-31 *Beyond ADHD* weaves Emmerson's personal story of his ADHD diagnosis exploring along the way the latest medical scientific and societal explanations and tools for managing and living with the condition Including interviews with a number of experts at the forefront of next generation ADHD diagnostics and treatment he questions the cookie cutter way ADHD is commonly diagnosed and treated Suggesting that the list of symptoms often used to identify ADHD can be attributed to many other disorders and conditions he explores how and why ADHD diagnoses have increased by 50% in the last ten years Emmerson advocates a different approach to ADHD arguing that it should be a diagnosis of exclusion rather than the other way around and that we must look past the label recognizing that individual symptoms vary and treatment plans should be better tailored to the individual He examines mental and behavioral issues from all sides including the possibility that nurturing rather than trying to alter or suppress the active 360 degree mind is a viable way for those diagnosed with ADHD to realize their gifts and lead purposeful lives
