Between Two Worlds Mexican Immigrants In The United States:

Between Two Worlds David G. Gutiérrez, 1996-04 Although immigrants enter the United States from virtually every nation Mexico has long been identified in the public imagination as one of the primary sources of the economic social and political problems associated with mass migration *Between Two Worlds* explores the controversial issues surrounding the influx of Mexicans to America The eleven essays in this anthology provide an overview of some of the most important interpretations of the historical and contemporary dimensions of the Mexican diaspora **The Xaripu Community across Borders** Manuel Barajas, 2009-04-17 During the past three decades there have been many studies of transnational migration Most of the scholarship has focused on one side of the border one area of labor incorporation one generation of migrants and one gender In this path breaking book Manuel Barajas presents the first cross national comparative study to examine a Mexican origin community s experience with international migration and transnationalism He presents an extended case study of the Xaripu community with home bases in both Xaripu Michoac n and Stockton California and elaborates how various forms of colonialism institutional biases and emergent forms of domination have shaped Xaripu labor migration community formation and family experiences across the Mexican U S border for over a century Of special interest are Barajas s formal and informal interviews within the community his examination of oral histories and his participant observation in several locations Barajas asks What historical events have shaped the Xaripus migration experiences How have Xaripus been incorporated into the U S labor market How have national inequalities affected their ability to form a community across borders And how have migration settlement and employment experiences affected the family especially gender relationships on both sides of the border **The Deportation Machine** Adam Goodman, 2020-06-23 By most accounts the United States has deported around five million people since 1882 but this includes only what the federal government calls formal deportations Voluntary departures where undocumented immigrants who have been detained agree to leave within a specified time period and self deportations where undocumented immigrants leave because legal structures in the United States have made their lives too difficult and frightening together constitute 90% of the undocumented immigrants who have been expelled by the federal government This brings the number of deportees to fifty six million These forms of deportation rely on threats and coercion created at the federal state and local levels using large scale publicity campaigns the fear of immigration raids and detentions to cost effectively push people out of the country Here Adam Goodman traces a comprehensive history of American deportation policies from 1882 to the present and near future He shows that one of the country s largest deportation operations expelled hundreds of thousands of people almost exclusively through the use of voluntary departures and through carefully planned fear campaigns that terrified undocumented immigrants through newspaper radio and television publicity These deportation efforts have disproportionately targeted Mexican immigrants who make up half of non citizens but 90% of deportees Goodman examines the political economy of

these deportation operations arguing that they run on private transportation companies corrupt public private relations and the creation of fear based internal borders for long term undocumented residents He grounds his conclusions in over four years of research in English and Spanish language archives and twenty five oral histories conducted with both immigration officials and immigrants revealing for the first time the true magnitude and deep historical roots of anti immigrant policy in the United Statesws that s

Migrating to Prison César Cuauhtémoc García Hernández, 2023-10-03 NATIONAL BESTSELLER A powerful in depth look at the imprisonment of immigrants addressing the intersection of immigration and the criminal justice system with a new epilogue by the author Argues compellingly that immigrant advocates shouldn t content themselves with debates about how many thousands of immigrants to lock up or other minor tweaks Gus Bova Texas Observer For most of America s history we simply did not lock people up for migrating here Yet over the last thirty years the federal and state governments have increasingly tapped their powers to incarcerate people accused of violating immigration laws Migrating to Prison takes a hard look at the immigration prison system s origins how it currently operates and why A leading voice for immigration reform C sar Cuauht moc Garc a Hern ndez explores the emergence of immigration imprisonment in the mid 1980s and looks at both the outsized presence of private prisons and how those on the political right continue disingenuously to link immigration imprisonment with national security risks and threats to the rule of law Now with an epilogue that brings it into the Biden administration Migrating to Prison is an urgent call for the abolition of immigration prisons and a radical reimagining of who belongs in the United States

Guevarra, Jr., 2012-05-09 Becoming Mexipino is a social historical interpretation of two ethnic groups one Mexican the other Filipino whose paths led both groups to San Diego California Rudy Guevarra traces the earliest interactions of both groups with Spanish colonialism to illustrate how these historical ties and cultural bonds laid the foundation for what would become close interethnic relationships and communities in twentieth century San Diego as well as in other locales throughout California and the Pacific West Coast Through racially restrictive covenants and other forms of discrimination both groups regardless of their differences were confined to segregated living spaces along with African Americans other Asian groups and a few European immigrant clusters Within these urban multiracial spaces Mexicans and

Filipinos coalesced to build a world of their own through family and kin networks shared cultural practices social organizations and music and other forms of entertainment They occupied the same living spaces attended the same Catholic churches and worked together creating labor cultures that reinforced their ties often fostering marriages Mexipino children living simultaneously in two cultures have forged a new identity for themselves Their lives are the lens through which these two communities are examined revealing the ways in which Mexicans and Filipinos interacted over generations to produce this distinct and instructive multiethnic experience Using archival sources oral histories newspapers and personal collections and photographs Guevarra defines the niche that this particular group carved out for itself
