Bilingual and Multilingual Education in the 21st Century Christian Abello-Contesse, Paul M. Chandler, María Dolores López-Jiménez, Rubén Chacón-Beltrán, 2013-10-30 Bilingual education is one of the fastest growing disciplines within applied linguistics This book includes the work of 20 specialists working in various educational contexts across Europe Latin America and North America to create a volume which is both comprehensive in scope and multidimensional in its coverage of current bilingual initiatives The central themes of this volume which draws on past experiences of bilingual education include issues in language use in classrooms at elementary secondary and tertiary levels participant perspectives on bilingual education experiences and the language needs of bi and multilingual students in monolingual schools This collection will be of interest to teachers and administrators in bi and multilingual education programs as well as scholars working in the field of language education *Bilingual Community Education and Multilingualism* Ofelia García, Zeena Zakharia, Bahar Otcu, 2012-09-15 This book takes up the lens of ethnolinguistic communities as they proudly educate their own children in their ways of speaking and being These bilingual community education programs are unlike bilingual programs in US public schools where speakers of languages other than English are often minoritized In these programs the children s linguistic and cultural diversity are their most valuable assets But these bilingual community education programs are also different from how others have characterized heritage language programs In these bilingual community education programs diasporic ethnolinguistic communities ensure that their children use their ways of speaking and being within a US global context Thus their interest is not in their heritage as the language and the culture was performed in the past in another space but as a dynamic bilingualism and biculturalism that is performed by American children publisher website **Bi- and multilingual universities: European perspectives and beyond** Daniela Veronesi, Christoph Nickenig, 2009 This collection of the proceedings of the 3rd conference on bi and multilingual universities held at the Free University of Bozen Bolzano from 20 to 22 September 2007 tries to give a state of the art insight into theoretical and practical approaches towards implementing bi and multilingual models and policies in higher education institutions in various parts of the world *International Handbook of English Language Teaching* Jim Cummins, Chris Davison, 2007-12-31 This two volume handbook provides a comprehensive examination of policy practice research and theory related to English language teaching ELT in international contexts Nearly 70 chapters highlight the research foundation for the best practices frameworks for policy decisions and areas of consensus and controversy in the teaching and development of English as a second and or additional language for kindergarten through to adult speakers of languages other than English In doing so it problematizes traditional dichotomies and challenges the very terms that provide the traditional foundations of the field A wide range of terms has been used to refer to the key

players involved in the teaching and learning of the English language and to the enterprise of English language teaching as a whole At various times and in different contexts the following labels have been used in countries where English is the dominant language to describe programs learners or teachers of English English as a second language ESL English as an additional language EAL limited English proficient LEP and English language learners ELL In contexts where English is not the dominant language the following terms have been used English as a foreign language EFL English as an international language EIL and English as a lingua franca ELF

Towards Multilingual Education Jasone Cenoz, 2009 This volume focuses on research in bilingual and multilingual education It discusses the results of research conducted in different multilingual educational contexts and particularly in Basque schools and universities where Basque Spanish and English are used as subjects and as languages of instruction

Speech and Language Disorders in Bilinguals Alfredo Ardila, Eliane Ramos, 2007 During the last years a significant number of papers books and monographs devoted to speech and language impairments in bilingual children have been published Different aspects and questions have been approached and today we have a relatively good understanding of the specific characteristics of the speech and

language difficulties potentially observed in bilingual and multilingual children This interest has been significantly resulted from the potential developmental and educational consequences of bilingualism Our understanding of the communication disorders in adult populations is notoriously more limited even though over 50% of the adult population can speak at least another language in addition to his her native language That simply means that over 50% of the communication disorders observed in adults are bilingual speech and language disorders bilingual aphasias bilingual dementias bilingual stuttering etc This book was written with the specific purpose of filling this gap The major purpose of this book has been to integrate the state of the art on the different aspects of the communication disorders observed in adult bilinguals The book is organised in such a way that an integrated perspective of bilingualism is presented from the normal conditions to the pathology from the clinical descriptions to the rehabilitation issues from the biological factors to the cultural variables
