Beyond the Global Culture War Adam K. Webb, 2013-08-21 Presenting a cross cultural critique of global liberalism this book argues for a broad based challenge that can meet it on its own scale It probes many of the key challenges we face in the new millennium and is a useful read for students of politics and globalization

After Progress Norman Birnbaum, 2001-02-08 The twentieth century witnessed a profound shift in both socialism and social reform In the early 1900s social reform seemed to offer a veritable religion of redemption but by the century s end while socialism remained a vibrant force in European society a culture of extreme individualism and consumption all but squeezed the welfare state out of existence Documenting this historic change After Progress European Socialism and American Social Reform in the 20th Century is the first truly comprehensive look at the course of social reform and Western politics after Communism brilliantly explained by a major social thinker of our time Norman Birnbaum traces in fascinating detail the forces that have shifted social concern over the course of a century from the devastation of two world wars to the post war golden age of economic growth and democracy to the ever increasing dominance of the market He makes sense of the historical trends that have created a climate in which politicians proclaim the arrival of a new historical epoch but rarely offer solutions to social problems that get beyond cost benefit analyses Birnbaum goes one step further and proposes a strategy for bringing the market back into balance with the social needs of the people He advocates a reconsideration of the notion of work urges that market forces be brought under political control and stresses the need for education that teaches the rights and responsibilities of citizenship Both a sweeping historical survey and a sharp edged commentary on current political posturing After Progress examines the state of social reform past present and future

Beyond Neoliberalism James F. Petras, Henry Veltmeyer, 2011 The world is at the crossroads of social change in the vortex of forces that are bringing about a different world a post neoliberal state This groundbreaking book lays out an analysis of the dynamics and contradictions of capitalism in the twenty first century These dynamics of forces are traced out in developments across the world in the Arab Spring of North Africa and the Middle East in Cuba and elsewhere in Latin America in the United States and in Asia The forces released by a system in crisis can be mobilized in different ways and directions The focus of the book is on the strategic responses to the systemic crisis As the authors tell it these dynamics concern three worldviews and strategic responses The Davos Consensus focuses on the virtues of the free market and deregulated capitalism as it represents the interests of the global ruling class The post Washington Consensus concerns the need to give capital a human face and establish a more inclusive form of development and global governance In addition to these two visions of the future and

projects the authors identify an emerging radical consensus on the need to move beyond capitalism as well as neoliberalism

America Divided Maurice Isserman, Michael Kazin, 2000 A definitive account of the turbulent 1960s America Divided presents the most sophisticated understanding to date of all sides of the decade's many political, social and cultural conflicts 45 photos

Beyond Black and White Manning Marable, 1995 A generation removed from the Civil Rights Movement and the Black Power explosion of the 1960s the pursuit of racial equality and social justice for African Americans seems more elusive than ever The realities of contemporary black America capture the nature of the crisis life expectancy for black males is now below retirement age median black income is less than 60 per cent that of whites over 600 000 African Americans are incarcerated in the US penal system 23 per cent of all black males between the ages of eighteen and 29 are either in jail on probation or parole or awaiting trial At the same time affirmative action programs and civil rights reforms are being challenged by white conservatism Confronted with a renascent right and the continuing burden of grotesque inequality Manning Marable argues that the black struggle must move beyond previous strategies for social change The politics of black nationalism which advocates the building of separate black institutions is an insufficient response The politics of integration characterized by traditional middle class organizations like the NAACP and Urban League seeks only representation without genuine power Instead a transformationist approach is required one that can embrace the unique cultural identity of African Americans while restructuring power and privilege in American society Only a strategy of radical democracy can ultimately deconstruct race as a social force Beyond Black and White brilliantly dissects the politics of race and class in the US of the 1990s Topics include the Clarence Thomas Anita Hill controversy the factors behind the rise and fall of Jesse Jackson's Rainbow Coalition Benjamin Chavis and the conflicts within the NAACP and the national debate over affirmative action Marable outlines the current debates in the black community between liberals Afrocentrists and the advocates of social transformation He advances a political vision capable of drawing together minorities into a majority which can throw open the portals of power and govern in its own name

Beyond Sociology Ananta Kumar Giri, 2017-12-20 This book explores the contours of a transformational sociology which seeks to reconsider the horizons of sociological imagination It questions accepted modernist assumptions such as the equation of society and nation state the dualism of individual and society and that of ontology and epistemology Arguing that contemporary sociology suffers from what Ulrich Beck calls the NATO-like firepower of western sociology it argues that sociology has to open itself to transcivilizational dialogues and planetary conversations about self culture and society The book also challenges scholars to go beyond a privileging of the post traditional telos of modernist sociology and puts forward a foundational interrogation of modernist sociology It underscores the limitations of established conventions of sociology and considering an alternative sociology based upon Confucian vision and practice of self transformation This collection offers a way to go beyond dominant structures of modern sociology and contemporary dominant ways of thinking about and doing sociology helping us cultivate a transdisciplinary
