Beyond Tranquillon Ridge:

Beyond Tranquillon Ridge Joseph N. Valencia, 2004 For too long the details of this tragedy have been shrouded in a fog of secrecy Beyond Tranquillon Ridge is a story that recounts the firefighting efforts during a frenzied 24 hour period known as the Honda Canyon Fire It is a history of the strategies and tactics used and it includes many first hand accounts of the conditions that firefighters and the military faced on the front lines including the tragic deaths of their comrades Joseph Valencia offers a brilliant look back re creating the sights and sounds of actual firefighting descriptive overviews of the landscape of South Vandenberg with rich profiles and command level decisions of the brave men who fought it In the end this one day in 1977 stands out as the pivotal time when wind and fire combined into a firestorm and where past compromises affected an outcome

California Stephen J. Pyne, 2016-06-17 The coastal sage and shrublands of California burn The mountain encrusting chaparral burns The conifer forests of the Sierra Nevada Cascades and Trinity Alps burn The rain shadowed deserts after watering by El Niño cloudbursts and the thick forests of the rumpled Coast Range all burn according to local rhythms of wetting and drying Fire season so the saying goes lasts 13 months In this collection of essays on the region Stephen J Pyne colorfully explores the ways the region has approached fire management and what sets it apart from other parts of the country Pyne writes that what makes California's fire scene unique is how its dramatically distinctive biomes have been yoked to a common system ultimately committed to suppression and how its fires burn with a character and on a scale commensurate with the state's size and political power California has not only a ferocity of flame but a cultural intensity that few places can match California's fires are instantly and hugely broadcast They shape national institutions and they have repeatedly defined the discourse of fire's history No other place has so sculpted the American way of fire California is part of the multivolume series describing the nation's fire scene region by region The volumes in To the Last Smoke also cover Florida the Northern Rockies the Great Plains the Southwest and several other critical fire regions The series serves as an important punctuation point to Pyne's fifty year career with wildland fire both as a firefighter and a fire scholar These unique surveys of regional pyrogeography are Pyne's way of keeping with it to the end encompassing the directive from his rookie season to stay with every fire to the last smoke

Area Ignition Joseph N. Valencia, 2009-05 In August 1979 along a remote ridgeline near Santa Maria four firefighters from a California Division of Forestry CDF engine crew were preparing to defend the northern flank of the Spanish Ranch fire Captain Ed Marty and firefighters Scott Cox Ron Lorant and Steve Manley responded to the fire from the Nipomo fire station They were all from California but were as different as the golden state's angles aspects and arenas They were defined more from where they were from Tehama Goleta Long Beach and La Habra No one predicted what would happen next but in a page from man versus nature the fire accelerated and then swept across the face of the slope which the four young firefighters were on At 4 25 PM their thin line of defense was cut off and a retreating bulldozer operator was overrun Minutes later they tried to escape from the sweeping area ignition but the fire cut off their retreat and along with another dozer operator they were all overrun by fire The tragedy that occurred and the subsequent investigation would change the way the state fire agency operated on area wildfires Area Ignition looks back 30 years to honor the men who fought and died in the Spanish Ranch Fire It recreates the courage emotion and human frailties that are interwoven from the initial ignition point to the final survivors thoughts as they proceeded past a solitary CDF fire engine Although much has changed since then young firefighters still go out every year to battle California wildfires just like their brothers of the past We owe it to them to understand a little bit of the awesome power of wildfires and the people who fight them

Between Two Fires Stephen J. Pyne, 2015-10-15 From a fire policy of prevention at all costs to today's restored burning Between Two Fires is America's history channeled through the story of wildland fire management Stephen J Pyne tells of a fire revolution that began in the 1960s as a reaction to simple suppression and single agency hegemony and then matured into more enlightened programs of fire management It describes the counterrevolution of the 1980s that stalled the movement the revival of reform after 1994 and the fire scene that has evolved since then Pyne is uniquely qualified to tell America's fire story The author of more than a score of books he has told fire's history in the United States Australia Canada Europe and the Earth overall In his earlier life he spent fifteen seasons with the North Rim Longshots at Grand Canyon National Park In Between Two Fires Pyne recounts how after the Great Fires of 1910 a policy of fire suppression spread from America's founding corps of foresters into a national policy that manifested itself as a costly all out war on fire After fifty years of attempted fire suppression a revolution in thinking led to a more pluralistic strategy for fire's restoration The revolution succeeded in displacing suppression as a sole strategy but it has failed to fully integrate fire and land management and has fallen short of its goals Today the nation's backcountry and increasingly its exurban fringe are threatened by larger and more damaging burns fire agencies are scrambling for funds firefighters continue to die and the

country seems unable to come to grips with the fundamentals behind a rising tide of megafires Pyne has once again constructed a history of record that will shape our next century of fire management Between Two Fires is a story of ideas institutions and fires It s America s story told through the nation s flames **Budget Analysis Series** ,2009 **Validation of a Surface-layer Windflow Model Using Climatology and Meteorological Tower Data from Vandenberg AFB, California** John M. Lanicci,1986 This report describes the 2nd phase of a study involving a surface layer windflow model The model produces a two dimensional x y plane variational analysis of windflow by employing Gauss principle of least constraints to adjust an initial windfield to effects of topography stability momentum advection and mass conservation It used detailed terrain data 100 to 200 m horizontal resolution to compensate for sparse meteorological data available over the small areas for which the model is run 25 to 250 sq km The first phase involved testing of the model to effects of stability and vegetation using terrain vegetation and climate for Ft Polk LA The 2nd phase involves further model development including changes in meteorological data input as well as changes in wind and stability initializations Model experiments using artificially produced terrain were conducted to test these changes A two part model validation was then performed using climate data and archived meteorological tower data from Vandenberg AFB California The area of interest is 11 x 12 km and covers the South Vandenberg Launch Complex **Resources and Environmental Protection** ,2010 **Far Beyond Forever** Stephen M. Taylor,2006-01-01 Beyond Tranquillon Ridge is a story about a phenomenon called firestorm In his riveting account Joseph Valencia follows the individual characters of this tragic wildfire from the high command including fire chiefs and generals down to the men on the front lines the firefighters and airmen Beyond Tranquillon Ridge is a place and time that stood still for twenty four hours It is a story of devastating wind explosive fire and the stranglehold of human drama amid the secret space launch facilities of Vandenberg Air Force Base Drawing on more than one hundred interviews Mr Valencia re creates the experience while his narrative describes the confusion and fear that was part of the worst fire in Vandenberg s history the Honda Canyon Fire Valencia s detailed research as well as his own personal experiences completes a puzzle of nature gone wild and man s attempt to control it The story ties together the physical and human dynamics that led to the deaths of the Air Force commander two fire chiefs and a heavy equipment operator It is a sweeping reconstruction of a significant event that changed the fate of Vandenberg for years to come Joint Conference on Applications of Air Pollution Meteorology ,1986
