Roberts, 2012-03-22 **EXPERIENTIAL EDUCATION** This book brings a thoughtful and refreshing perspective on experiential education Educators interested in outdoor learning service learning and place based learning will find in Roberts analysis a critical understanding of what learning by doing means Dilafruz Williams Portland State University What is experiential education What are its theoretical roots Where does this approach come from Offering a fresh and distinctive take this book is about going beyond learning by doing through an exploration of its underlying theoretical currents As an increasingly popular pedagogical approach experiential education encompasses a variety of curriculum projects from outdoor and environmental education to service learning and place based education While each of these sub fields has its own history and particular approach they draw from the same progressive intellectual taproot Each in its own way evokes the power of learning by doing and direct experience in the educational process By unpacking the assumed homogeneity in these terms to reveal the underlying diversity of perspectives inherent in their usage this book allows readers to see how the approaches connect to larger conversations and histories in education and social theory placing experiential education in social and historical context Combining a critical philosophical approach with practical examples from the field *Beyond Learning by Doing* gives readers both an excellent summary of the theoretical histories of experiential education and a thesis driven argument about the current state of the field and its future possibilities and limitations Jay W Roberts is Associate Professor

Dawson,John C. Hendee,2025-02-20 For 45 years this classic textbook on wilderness management has served as the most comprehensive information available on the stewardship and protection of wilderness resources and values The seventeen chapters outline the history legislation policies planning and stewardship carried out by the four federal land managing agencies Forest Service National Park Service Bureau of Land Management and Fish and Wildlife Service entrusted with stewardship and protection of the more than 110 million acre National Wilderness Preservation System Written for wilderness and wildlands

planners managers stewards advocates and educators this revised fifth edition builds on the material of the first four editions and extensively updates chapters on international wilderness managing for appropriate wilderness conditions wilderness ecosystems fire in wilderness ecosystems ecological impacts of wilderness recreation and their management and wilderness visitor management This textbook is an invaluable guide for resource managers students scientists policy makers and for wilderness advocates and visitors around the world *Looking Beyond Borderlines* Lee Rodney, 2016-12-19 American territorial borders have undergone significant and unparalleled changes in the last decade They serve as a powerful and emotionally charged locus for American national identity that correlates with the historical idea of the frontier But the concept of the frontier so central to American identity throughout modern history has all but disappeared in contemporary representation while the border has served to uncomfortably fill the void left in the spatial imagination of American culture This book focuses on the shifting relationship between borders and frontiers in North America specifically the ways in which they have been imaged and imagined since their formation in the 19th century and how tropes of visibility are central to their production and meaning Rodney links ongoing discussions in political geography and visual culture in new ways to demonstrate how contemporary American borders exhibit security as a display strategy that is resisted and undermined through a variety of cultural practices *Moving Beyond Church Growth* Mark A. Olson, 2001-12-01 Character development for communities of faith Mark Olson believes that trying to meet unrealistic expectations for church growth along with expectations that pastors be all things to all people has resulted in low morale even burnout among clergy and dissension within congregations Olson's book argues that church growth models exemplify and exacerbate the tendencies of the modern age and Constantinian Christianity holding the church hostage to technique and marketing These assumptions set up pastors and churches for disappointment and failure But they also in his opinion miss an opportunity to envision a faithful alternative to the consumeristic church Olson's valuable book calls church leaders to faithful bold and courageous rethinking of congregational life and witness in substance purpose and style His own 20 years of ministry in rural suburban and urban congregations inform an alternative rooted deeply in the past and anchored in strong leadership and worship but also profoundly compassionate and engaged in the surrounding community In this model pastors primary responsibilities are not to fix everything and everybody but to enable people to be present to each other and to provide hope *A Sense of Place, a Sense of Time* John Brinckerhoff Jackson, 1994-01-01 J B Jackson a pioneer in the field of landscape studies here takes us on a tour of American landscapes past and present showing how our surroundings reflect important changes in our culture Because we live in urban and industrial environments that are constantly evolving says Jackson time and movement are increasingly important to us and place and permanence are less so We no longer gain a feeling of community from where we live or where we assemble but from common work hours habits and customs Jackson examines the new vernacular landscape of trailers parking lots trucks loading docks and suburban garages which all reflect this emphasis on mobility and transience

he redefines roads as scenes of work and leisure and social intercourse as places rather than as means of getting to places he argues that public parks are now primarily for children older people and nature lovers while more mobile or gregarious people seek recreation in shopping malls in the street and in sports arenas he traces the development of dwellings in New Mexico from prehistoric Pueblo villages to mobile homes and he criticizes the tendency of some environmentalists to venerate nature instead of interacting with it and learning to share it with others in temporary ways Written with his customary lucidity and elegance this book reveals Jackson's passion for vernacular culture his insights into a style of life that blurs the boundaries between work and leisure between middle and working classes and between public and private spaces
