Beyond Geography:

Beyond Walls: Re-inventing the Canada-United States Borderlands Victor Konrad, Heather Nicol, 2016-12-05 September 11 2001 marked the beginning of a new era of security imperatives for many countries The border between Canada and the United States suddenly emerged from relative obscurity to become a focus of constant attention by media federal and state provincial governments on both sides of the boundary and the public at large This book provides a comprehensive examination of the Canada USA border in its 21st century form placing it within the context of border and borderlands theory globalization and the changing geopolitical dialogue It argues that this border has been reinvented as a state of the art technology steeped crossing system while the image of the border has been engineered to appear consistent with the friendly border of the past It shows how a border can evolve to a heightened level of security and yet continue to function well sustaining the massive flow of trade It argues whether in doing so the US Canada border offers a model for future borderlands Although this model is still evolving and still aspires toward better management practices the template may prove useful not only for North America but also in conflict border zones as well as the meshed border regions of the EU Africa s artificial line boundaries and other global situations

Apartheid and Beyond Rita Barnard, 2012-08-01 Apartheid and Beyond offers trenchant historically sensitive readings of writings by Coetzee Gordimer Fugard Tlali Dike Magona and Mda focusing on the intimate relationship between place subjectivity and literary form It also explores the way apartheid functioned in its day to day operations as a geographical system of control exerting its power through such spatial mechanisms as residential segregation bantustans passes and prisons Throughout the study Rita Barnard provides historical context by highlighting key events such as colonial occupation the creation of black townships migration forced removals the emergence of informal settlements and the gradual integration of white cities Apartheid and Beyond is both an innovative account of an important body of politically inflected literature and an imaginative reflection on the socio spatial aspects of the transition from apartheid to democracy

Beyond Costs Elías Albagli, Mr. Francesco Grigoli, Emiliano Luttini, Dagoberto Quevedo, Marco Rojas, 2025-08-15 This paper documents five empirical facts about the role of strategic complementarities in firms price setting behavior using administrative data from Chilean firms 1 Strategic complementarities play a dominant role in price setting exerting a stronger influence than changes in marginal costs 2 While the strength of strategic complementarities varies across sectors they consistently outweigh the role of cost changes 3 In high inflation environments firms become more responsive to changes in the prices of their competitors 4 Firms respond more strongly to competitor price increases than to decreases mirroring the rockets and feathers phenomenon of costs 5 Strategic complementarities are stronger among firms with fewer competitors larger market shares and broader customer bases These findings suggest that strategic complementarities a source of real rigidities are sizable state dependent asymmetric and shaped by market structure

Beyond Orientalism Eli Franco, Karin Preisendanz, 2023-12-14 Wilhelm Halbfass

philosopher and Indologist is a committed participant in the dialogue between India and Europe whose reflections on the Indian tradition and its Western perception are accompanied by reflection on and critical examination of the Western tradition In this innovative combination of Indological research and philosophical hermeneutical research in the history of ideas he demonstrates a purpose more ambitious and a scope wider than Edward Said s who constructed the Western study of the so called Orient as an attempt to deprive it of its identity and sovereignty and who perceived the pursuit of Oriental Studies in Western universities to be an extension of a fundamentally political will to power and domination Without denying the domination of the dialogue between India and Europe by the West Halbfass goes beyond that to show a different way of approaching Indian thought he strives to establish the presuppositions and prerequisites that would make a true dialogue and mutual understanding between Indian and Western intellectual cultures possible The papers in the present volume originate from twenty three scholars of Indology philosophy religious studies comparative theology classics folkloristics and political theory working in eleven countries spread over three continents They address central issues of Halbfass work his critical responses to them commence with an extensive essay in which he assesses in a masterly manner the state of Indian studies almost twenty years after the publication of Said s Orientalismz **Beyond the Frontier** Harold Peter

Reginbogin,2022-06-27

The collapse of the Soviet Union and the wars in Yugoslavia radically changed the security environment in Europe and Central Asia Some predictions assumed the emerging unipolarity of the liberal world order would end neutrality policies in East and West but as this volume shows this was not the case While some traditional Cold War neutrals like Sweden and Finland have been edging closer to security alignment with western institutions there are others like Austria Switzerland Ireland and Malta that remained committed to their traditional nonaligned foreign policy approaches More importantly there are areas of Eurasia that developed new forms of neutrality policies most of them only noticed on the margins of academic

discourse This is the first book to systematically explore this new neutralism of the Post Cold War In part one the book analyzes contemporary neutrality discourse on several levels like international organizations UN ASEAN diplomacy and academic theory Part two discusses neutrality related policy developments in Belarus Moldova Ukraine Georgia Serbia Turkmenistan Afghanistan and Mongolia Together the 15 chapters show how on this vast connected landmass references to neutrality have remained a staple of international politics **Beyond the Text** Lawrence A. Hoffman,1989-08-22 This unique and groundbreaking study moves beyond the texts of prayers to carefully study the worshipping community from an anthropological perspective Hoffman s innovative approach opens up the world of prayer to the academy and the community at large With the publication of this book the study of liturgy will never again be the same Literary Geographies S. Hones,2014-08-07 Combining literary analysis with a practical introduction to interdisciplinary literary geography Literary Geographies examines key elements of Colum McCann s 2009 novel Let the Great World Spin Hones examines concepts such as narrative space literary and academic collaboration and the geographies of creation production and reception
