Beyond Th4e Burdekin:

Estuaries of Australia in 2050 and beyond Eric Wolanski, 2013-08-28 The book addresses the questions Is Australia s rapidly growing human population and economy environmentally sustainable for its estuaries and coasts What is needed to enable sustainable development To answer these questions this book reports detailed studies of 20 iconic Australian estuaries and bays by leading Australian estuarine scientists That knowledge is synthesised in time and space across Australia to suggest what Australian estuaries will look like in 2050 and beyond based on socio economic decisions that are made now and changes that are needed to ensure sustainability The book also has a Prologue by Mr Malcolm Fraser former Prime Minister of Australia which bridges environmental science population policy and sustainability *Beyond the Big Run* Charlie Schultz, Darrell Lewis, 2002 I ll be lucky to last a bloody year was the prediction of nineteen year old Charlie Schultz That was 1928 when he first arrived to take up the management of Humbert River Station A tiny run down property in a tangle of wild ranges neighbour to the vast and legendary Victoria River Downs Humbert was at the very edge of Australia s last frontier There were hostile blacks in the ranges fences were almost unknown and wild cattle overran the stations Battling loneliness hardship and the wild bush itself Charlie was to last the year He went on to work Humbert Station for another forty three years Gathered from extensive interviews with Victoria River District historian Darrell Lewis Charlie s remarkable life stories intersect with the colourful events and characters of the day Here are the renegades ruthless bosses floods and droughts gun fights and spearings Christmas sports and horse races that capture the historic sweep of Charlie Schultz s extraordinary life and achievements , *Dystopias and Utopias on Earth and Beyond* Douglas A. Vakoch, 2021-04-29 Caught as we are in a grave climate crisis that seems more irreversible with every passing year our literary portrayals of the future often feature the dystopian collapse of the world as we know it Science fiction explores how we got here while pointing toward a more hopeful path forward From an ecofeminist perspective a core cause of our current ecological catastrophe is the patriarchal domination of nature playing out in parallel with the oppression of women As an alternative to dystopian futures that seem increasingly inevitable ecofeminist science fiction helps us conjure utopias that promote environmental sustainability based on more egalitarian human relationships *Dystopias and Utopias on Earth and Beyond* Feminist Ecocriticism of Science Fiction explores the fictional worlds of such canonical novelists as Margaret Atwood Octavia Butler Ursula K Le Guin Doris Lessing and Joan Slonczewski as well as those of lesser known science fiction writers as they collectively probe humanity s greatest existential threats Contributors from five continents provide compelling analyses of far future dystopias on Earth that are all too easy to imagine becoming reality if humankind s current trajectory continues as well as provocative insights into science fiction utopias set on idyllic planets orbiting distant stars which offer liberatory alternatives that might someday be actualized in the real world By examining the links between the destruction of the environment and the domination of women *Dystopias and Utopias on Earth and Beyond* provides the tools to counteract

those intertwined oppressions helping create a foundation for a truly habitable world *Scotland* Mountford John Byrde Baddeley,1890 *Journal through the counties of Berwick, Roxburgh, Selkirk, Dumfries, Ayr, Lanark, East, West, & Mid Lothians, in ... 1817*, by W.G.
