integration with the active components Many technologies are expected to enhance the capabilities of the U S military in the twenty first century including precision weapons high fidelity sensors long range surveillance enhanced stealth characteristics and advanced communications and information systems This study reaffirms the importance of improved communication and information systems for improving comprehensive training and accelerating the mobilization of reserve components for military missions in the coming decade Although programs using these technologies are already under way in both the reserve and active components of the military this study focuses on the effectiveness of reserve components and active reserve integration
