today     **Pictorial Archaeology** Roger Balm, 2024-02-27 This book explores the expressly pictorial type of visual archaeology the transcribing of three dimensional materiality into two dimensional depictions and its influential history within the discipline The picturing of ancient sites and artifacts to convey information links visual reporting with the workings of the imagination and indicates that the study of antiquity has always had a hybrid identity part artistic and part scientific In examining expressly pictorial forms of visual story telling about the past this book looks beyond certain supposed creative turns and focuses instead on creative continuities answering key questions about the power of picturing and its ability to not only inform documentary practices but actively structure those practices How are prints drawings paintings and photographs able to collapse the three dimensional world of the ancient past onto a flat page but also convey a sense of material reality In contemporary practice how do pictorial ways of seeing enable the interpretation of material remains but also shape the recognition of digital traces on a computer screen Published illustrations both historical and contemporary are primary sources of evidence for answering such questions and identifying common patterns of pictorial information This book provides a framework for scholars researching the visual culture of archaeology as well as the history of archaeology It is also recommended for professionals in the fields of heritage studies conservation and community archaeology     *Becoming an Archaeologist* Joseph Flatman, Joe Flatman, 2022-11-03 *Becoming an Archaeologist* A Guide to Professional Pathways is an engaging handbook on career paths in archaeology It outlines the process of getting a job in archaeology including various career options the training required and how to get positions in the academic commercial government and charity sectors This new edition has been substantially revised and updated The coverage has been expanded to include many more examples of archaeological lives and livelihoods from dozens of countries around the world It also has more interviews with in depth analyses of the career paths of over twenty different archaeologists working around the world Data on the demographics of archaeologists has also been updated as have sections on access to and inclusion in archaeology The volume also includes revised and updated appendices and a new bibliography Written in an accessible style the book is essential reading for anyone interested in a career in archaeology in the twenty first century     **Shipwreck Hauntography** Sara Rich, 2025-10-01 Drawing on a broad theoretical range from speculative realism to feminist psychoanalysis and anti colonialism this book represents a radical departure from traditional scholarship on maritime archaeology Shipwreck Hauntography asserts that nautical archaeology bears the legacy of Early Modern theological imperialism most evident through the savior scholar model that resurrects physically or virtually ships from wrecks Instead of construing shipwrecks as dead awaiting resurrection from the seafloor this book presents them as vibrant if not recalcitrant objects having shaken off anthropogenesis through varying stages of ruination Sara Rich illustrates this anarchic condition with hauntographs of five Age of Discovery shipwrecks each of which elucidates the wonder of failure and finitude alongside an intimate brush with the eerie horrific and uncanny     Spooky Archaeology Jeb J. Card, 2018-06-15 By exploring the development of archaeology

this book helps us understand what archaeology is and why it matters      Archaeoastronomy Giulio Magli, 2025-01-02 This book provides the first comprehensive easy to read and up to date account of the fascinating discipline of archaeoastronomy in which the relationship between ancient constructions and the sky is studied to gain a better understanding of the ideas of the architects of the past and their religious and symbolic worlds The book is divided into three sections The first section discusses in detail the fundamentals of archaeoastronomy including the celestial coordinates the apparent motion of the sun moon stars and planets observation of celestial bodies at the horizon the use of astronomical software in archaeoastronomy and current methods for making and analyzing measurements The second part explores the past relations between astronomy and people power the afterworld architecture and landscape The final section reviews what archaeoastronomy can now tell us about the nature and purpose of such sites and structures as Stonehenge the Pyramids of Giza Chichen Itza the Angkor Temples the Campus Martius Machu Picchu and the Valley of the Temples of Agrigento Additionally it provides a set of exercises that can be performed using non commercial free software e g Google Earth and Stellarium and that will equip readers to conduct their research This book is an ideal introduction to what has become a wide ranging multidisciplinary science This newly revised edition includes the most recent research on Stonehenge ancient Japan and other sites worldwide      **An Archaeology of Land Ownership** Maria Relaki, Despina Catapoti, 2013-10-23 Within archaeological studies land tenure has been mainly studied from the viewpoint of ownership A host of studies has argued about land ownership on the basis of the simple co existence of artefacts on the landscape other studies have tended to extrapolate land ownership from more indirect means Particularly noteworthy is the tendency to portray land ownership as the driving force behind the emergence of social complexity a primordial ingredient in the processes that led to the political and economic expansion of prehistoric societies The association between people and land in all of these interpretive schemata is however less easy to detect analytically Although various rubrics have been employed to identify such a connection most notable among them the concepts of cultures regions or even households they take the links between land and people as a given and not as something that needs to be conceptually defined and empirically substantiated An Archaeology of Land Ownership demonstrates that the relationship between people and land in the past is first and foremost an analytical issue and one that calls for clarification not only at the level of definition but also methodological applicability Bringing together an international roster of specialists the essays in this volume call attention to the processes by which links to land are established the various forms that such links take and how they can change through time as well as their importance in helping to forge or dilute an understanding of community at various circumstances
