Archaeologies Of Materiality:

Archaeologies of Materiality Lynn Meskell, 2008-04-15 Drawing on social theory and offering numerous case studies *Archaeologies of Materiality* is one of the first books to explore materiality across time and space Demonstrates the saliency of materiality by linking it to concepts of landscape technology embodiment ritual and heritage Offers archaeological case studies ranging from prehistoric to contemporary contexts from Neo Assyria South Africa Argentina Panama and the United States Explores the idea of a material universe that is socially conceived and constructed but that also shapes human experience in daily practice **Handbook of Landscape Archaeology** Bruno David, Julian Thomas, 2016-06-03 Over 80 archaeologists from four continents create a benchmark volume of the ideas and practices of landscape archaeology covering the theoretical and the practical the research and conservation and encasing the term in a global framework Personal Adornment and the Construction of Identity Hannah V. Mattson, 2021-06-09 Objects of adornment have been a subject of archaeological historical and ethnographic study for well over a century Within archaeology personal ornaments have traditionally been viewed as decorative embellishments associated with status and wealth materializations of power relations and social strategies or markers of underlying social categories such as those related to gender class and ethnic affiliation *Personal Adornment and the Construction of Identity* seeks to understand these artefacts not as signals of steady pre existing cultural units and relations but as important components in the active and contingent constitution of identities Drawing on contemporary scholarship on materiality and relationality in archaeological and social theory this book uses one genre of material culture items of bodily adornment to illustrate how humans and objects construct one another Providing case studies spanning 10 countries three continents and more than 9 000 years of human history the authors demonstrate the myriad and dynamic ways personal ornaments were intertwined with embodied practice and identity performativity the creation and remaking of social memories and relational collections of persons materials and practices in the past The authors careful analyses of production methods and composition curation heirlooming and reworking decorative attributes and iconography position within assemblages and depositional context illuminate the varied material and relational axes along which objects of adornment contained social value and meaning When paired with the broad temporal and geographic scope collectively represented by these studies we gain a deeper appreciation for the subtle but vital roles these items played in human lives **Entangled** Ian Hodder, 2012-05-08 A powerful and innovative argument that explores the complexity of the human relationship with material things demonstrating how humans and societies are entrapped into the maintenance and sustaining of material worlds Argues that the interrelationship of humans and things is a defining characteristic of human history and culture Offers a nuanced argument that values the physical processes of things without succumbing to materialism Discusses historical and modern examples using evolutionary theory to show how long standing entanglements are irreversible and increase in scale and complexity over time Integrates aspects of a diverse array of contemporary theories

in archaeology and related natural and biological sciences Provides a critical review of many of the key contemporary perspectives from materiality material culture studies and phenomenology to evolutionary theory behavioral archaeology cognitive archaeology human behavioral ecology Actor Network Theory and complexity theory **Objects and Materials** Penny Harvey,Eleanor Casella,Gillian Evans,Hannah Knox,Christine McLean,Elizabeth B.
