Unquiet Pasts Stephanie Koerner, 2016-12-05 This important book addresses critical themes in the development of archaeology as a reflexive self critical discipline in the modern world It explores the ethical political and cultural tensions and responsibilities which need to be addressed by archaeologists when working within networks of global ecologies and communities examining how authoritarian traditions can exacerbate the divide between expert and public knowledge Moreover it analyses how localized acts of archaeology relate to changing conceptions of risk heritage culture identity and conflict Bringing insights from Alain Schnapp Michael Shanks Isabelle Stengers Bruno Latour Ulrich Beck John Urry and others to cross disciplinary discussions of these themes *Unquiet Pasts* shows how archaeological discourse can contribute towards engaging and understanding current dilemmas It also shows how archaeology as a localized and responsibly exercised practice can play a part in building our commonly shared and experienced world **Antiquarianisms** Benjamin Anderson, Felipe Rojas, 2017-05-31 Antiquarianism and collecting have been associated intimately with European imperial and colonial enterprises although both existed long before the early modern period and both were and continue to be practiced in places other than Europe Scholars have made significant progress in the documentation and analysis of indigenous antiquarian traditions but the clear cut distinction between indigenous and colonial archaeologies has obscured the intense

and dynamic interaction between these seemingly different endeavours This book concerns the divide between local and foreign antiquarianisms focusing on case studies drawn primarily from the Mediterranean and the Americas Both regions host robust pre modern antiquarian traditions that have continued to develop during periods of colonialism In both regions moreover colonial encounters have been mediated by the antiquarian practices and preferences of European elites The two regions also exhibit salient differences For example Europeans claimed the antiquities of the eastern Mediterranean as part of their own classical heritage whereas they perceived those of the Americas as essentially alien even as they attempted to understand them by analogy to the classical world These basic points of comparison and contrast provide a framework for conjoint analysis of the emergence of hybrid or cross bred antiquarianisms Rather than assuming that interest in antiquity is a human universal this book explores the circumstances under which the past itself is produced and transformed through encounters between antiquarian traditions over common objects of interpretation *Wakan Tanka* John Bennett,2021-02-25

Where did we come from Why are we here Is there a god In our modern world many people yearn for answers to these most fundamental of life s questions having become disillusioned with trite explanations and troubled by narratives that deny their intuitive spirituality Beginning with some of our most ancient ancestors *Wakan Tanka* traces the evolution of humanity through the ages Citing paleontological and archaeological discoveries along with recent genetic evidence it recounts how mankind evolved from the earliest mammals into anatomically and behaviourally modern humans *Wakan Tanka* describes how human culture and spirituality evolved in concert with anatomy Showing how humankind has since very ancient times had an instinctual moral sense it discusses how our spirituality has given us an appreciation for both the aesthetic and divine aspects of life as reflected in our cultures and artistic endeavours By comparing philosophical and religious views of creation with modern scientific theory *Wakan Tanka* reaches the conclusion that rather than conflicting these views are remarkably similar and equally valid ways of describing the same reality Indeed our scientific knowledge and spiritual beliefs can be harmonized providing us with a deeper understanding of ourselves of creation and of life s purpose Fieldwork in

Humanities Education in Singapore Teddy Y.H. Sim,Hwee Hwang Sim,2021-02-20 This book addresses the topic of humanities education fieldwork using the Singapore context as its primary focus It explores how the thought processes behind and techniques of various humanities and social sciences subjects can be applied to fieldwork in a variety of school and training settings In addition it discusses how humanities students and educators could stand to benefit from utilizing fieldwork techniques and skills used in archaeology and anthropology beyond undergraduates majoring in that discipline Finally the adoption of multidisciplinary approaches in fieldwork incorporating history geography literature and social studies demonstrate how these subjects can collaborate together in actual case studies to facilitate participants learning in the field **1177 B.C.** Eric H. Cline,2021-02-02 In a follow up to 1177 BC this book provides a portrait of the 400 years following the collapse of the Bronze Age a period referred to as the First Dark Age but which Cline will show was also an era
