Applying Natures Design:

Applying Nature's Design Anthony Bennett Anderson, Clinton N. Jenkins, 2006 Human actions are fragmenting habitats throughout the world To address this problem conservationists have set up biological corridors areas of land set aside to facilitate the movement of species and ecological processes This book offers an overview of the design and effectiveness of these corridors An Interdisciplinary Approach to the Theory and Practice of Wildlife Corridors Amy D. Proven, 2024-06-11

An Interdisciplinary Approach to the Theory and Practice of Wildlife Corridors charts some best practices and makes some new theoretical contributions related to the design and creation of wildlife corridors in Anthropocene times While the book will provide much of the knowledge necessary for a general and credible understanding of connectivity projects it will also make a unique theoretical contribution to current knowledge about wildlife corridors by arguing that theories about compassion empathy and traditional ecological knowledge should inform wildlife corridor projects **Design by Nature**

Engineering Design and Mathematical Modelling Nnamdi Nwulu,Mammo Muchie,2020-12-17 Engineering Design and Mathematical Modelling Concepts and Applications consists of chapters that span the Engineering design and mathematical modelling domains Engineering design and mathematical modelling are key tools techniques in the Science Technology and Innovation spheres Whilst engineering design is concerned with the creation of functional innovative products and processes mathematical modelling seeks to utilize mathematical principles and concepts to describe and control real world phenomena Both of these can be useful tools for spurring and hastening progress in developing countries They are also areas where Africa needs to skill up in order to build a technological base The chapters in this book cover the relevant research trends in the fields of both engineering design and mathematical modelling This book was originally published as a special issue of the African Journal of Science Technology Innovation and Development Flow Phenomena in Nature: Inspiration, learning and application R. Liebe,2007 Do we have an adequate understanding of fluid dynamics phenomena in nature and evolution and what physical models do we need What can we learn from nature to stimulate innovations in thinking as well as in engineering applications Concentrating on flight and propulsion this unique and accessible book compares fluid dynamics solutions in nature with those in engineering The respected international contributors present up to date research in an easy to understand manner giving common viewpoints from fields such as zoology engineering biology fluid mechanics and physics This transdisciplinary approach eliminates barriers and opens wider perspectives to both of the challenging questions above Contents Applications in Engineering and Medicine Inspiration from Nature Steady and Unsteady Fluid Dynamics Specific Numerical and Experimental Methods *Applied Art, Drawing, Painting, Design and Handicraft* Pedro Joseph Lemos,1920 Only enough reading matter has been included to unify the illustrations For the beginner though he be of mature years the first chapters contain important foundations Each succeeding chapter presents progressive suggestions for the teacher and student and guidance for the parent desiring an interesting for of vocational art study for the young artist foreword page 6 **Knowing Nature** Mara J. Goldman,Paul Nadasdy,Matthew D. Turner,2011-03-15 Political ecology and

science studies have found fertile meeting ground in environmental studies While the two distinct areas of inquiry approach the environment from different perspectives one focusing on the politics of resource access and the other on the construction and perception of knowledge their work is actually more closely aligned now than ever before Knowing Nature brings together political ecologists and science studies scholars to showcase the key points of encounter between the two fields and how this intellectual mingling creates a lively and more robust ecological framework for the study of environmental politics The contributors all actively work at the interface between these two fields and here they use empirical material to explore questions of theoretical and practical import for understanding the politics that surround nature society relations from wildlife management in the Yukon to soil fertility in Kenya In addition they examine how various environmental knowledge claims are generated packaged promoted and accepted or rejected by the different actors involved in specific cases of environmental management conservation and development Finally they ask what is at stake in the struggles surrounding environmental knowledge how such struggles shape conceptions of the environment and whose interests are served in the process

Routledge Handbook of Landscape and Food Joshua Zeunert, Tim Waterman, 2018-02-02 Since the turn of the millennium there has been a burgeoning interest in and literature of both landscape studies and food studies Landscape describes places as relationships and processes Landscapes create people's identities and guide their actions and their preferences while at the same time are shaped by the actions and forces of people Food as currency medium and sustenance is a fundamental part of those landscape relationships This volume brings together over fifty contributors from around the world in forty profoundly interdisciplinary chapters Chapter authors represent an astonishing range of disciplines from agronomy anthropology archaeology conservation countryside management cultural studies ecology ethics geography heritage studies landscape architecture landscape management and planning literature urban design and architecture Both food studies and landscape studies defy comprehension from the perspective of a single discipline and thus such a range is both necessary and enriching The Routledge Handbook of Landscape and Food is intended as a first port of call for scholars and researchers seeking to undertake new work at the many intersections of landscape and food Each chapter provides an authoritative overview a broad range of pertinent readings and references and seeks to identify areas where new research is needed though these may also be identified in the many fertile areas in which subjects and chapters overlap within the book
