Under Construction: Logics of Urbanism in the Gulf Region Steffen Wippel, Katrin Bromber, Birgit Krawietz, 2016-02-17 Interdisciplinary in approach this volume explores and deciphers the symbolic value and iconicity of the built environment in the Arab Gulf Region its aesthetics language and performative characteristics Bringing

together a range of studies by artists curators and scholars it demonstrates how Dubai appeared at least until the financial crisis to be leading the construction race and has already completed a large number of its landmark architecture and strategic facilities In contrast cities like the Qatari capital Doha still appear to be heavily under construction and in countries like the Sultanate of Oman ultra luxury tourism projects were started only recently While the construction of artificial islands theme parks and prestige sport facilities has attracted considerable attention much less is known about the region s widespread implementation of innovative infrastructure such as global container ports free zones inter island causeways and metro lines This volume argues that these endeavours are not simply part of a strategy to prepare for the post oil era for future economic survival and prosperity in the Lower Gulf region but that they are also aiming to strengthen identitarian patterns and specific national brands In doing so they exhibit similar yet remarkably diverse modes of engaging with certain global trends and present questionably distinct ideas for putting themselves on the global map Each country aims to grab attention with regard to the world wide flow of goods and capital and thus provide its own citizens with a socially acceptable trajectory for the future By doing that the countries in the Gulf are articulating a new semiotic and paradigm of urban development For the first time this volume maps these trends in their relation to architecture and infrastructure in particular by treating them as semiotics in their own right It suggests that recent developments in this region of the world not only represent

Falcon Helen Macdonald, 2016-11-15 Before best selling author Helen Macdonald told the story of the goshawk in *H Is for Hawk* she told the story of the falcon in a cultural history of the masterful creature that can cut the sky in two with the perfectly aerodynamic profile of a raindrop as she so incisively puts it In talon sharp prose she explores the spell the falcon has had over her and by extension all of us whether we've seen them through binoculars framed on gallery walls versified by poets flown as hunting birds through Manhattan windows sewn on flags stamped on badges or winnowing through the clouds over abandoned arctic radar stations Macdonald dives through

centuries and careens around the globe to tell the story of the falcon as it has flown in the wild skies of the natural world and those of our imagination Mixing history myth and legend she explores the long history of the sport of falconry in many human cultures from Japan to Abu Dhabi to Oxford she analyzes the falcon s talismanic power as a symbol in art politics and business and she addresses the ways we have both endangered and protected it Along the way we discover how falcons were mobilized in secret military projects their links with espionage the Third Reich the Holy Roman Empire and space programs and how they have figured in countless stories of heroism and of course the erotic Best of all Macdonald has given us something fresh a new introduction that draws on all her experience to even further invigorate her cherished subject The result is a deeply informed book written with the same astonishing lyrical grace that has captivated readers and had everyone talking about this writer cum falconer

Problematic Wildlife Francesco M. Angelici,2015-12-18 This book provides insight into the instances in which wildlife species can create problems Some species trigger problems for human activities but many others need humans to save them and to continue to exist The text addresses issues faced by economists and politicians dealing with laws involving actions undertaken to resolve the problems of the interaction between humans and wildlife Here the words problematic species are used in their broadest sense as may be appreciated in the short introductions to the various sections At times the authors discuss special cases while always extending the discussion into a more general and broad vision At others they present real cutting edge analysis of ecological topics and issues The book will be of interest to biologists ecologists and wildlife managers involved in research on wildlife parks and environmental management as well as to government departments and agencies NGOs and conservation wildlife organizations Even those in contact with nature such as hunters herders and farmers will be able to find a great deal of important information Specific case studies are selected from among the most significant and prevalent cases throughout the world A total of 26 papers have been selected for this book written by zoologists biologists and ecologists Many have an interdisciplinary approach with contributions by economists criminologists technical specialists and engineers
