Weeks, Jason de Medeiros, 2014-11-25 The archaeological study of the ancient world has become increasingly popular in recent years A Research Guide to the Ancient World Print and Electronic Sources is a partially annotated bibliography The study of the ancient world is usually although not exclusively considered a branch of the humanities including archaeology art history languages literature philosophy and related cultural disciplines which consider the ancient

cultures of the Mediterranean world and adjacent Egypt and southwestern Asia Chronologically the ancient world would extend from the beginning of the Bronze Age of ancient Greece ca 1000 BCE to the fall of the Western Roman Empire ca 500 CE This book will close the traditional subject gap between the humanities Classical World Egyptology and the social sciences anthropological archaeology Near East in the study of the ancient world This book is uniquely the only bibliographic resource available for such holistic coverage The volume consists of 17 chapters and seven appendixes arranged according to the traditional types of library research materials bibliographies dictionaries atlases etc The appendixes are mostly subject specific including graduate programs in ancient studies reports from significant archaeological sites numismatics and paleography and writing systems These extensive author and subject indexes help facilitate ease of use

Field Archaeology from Around the World Martin Carver, Bissierka Gaydarska, Sandra Montón-Subías, 2014-11-26 Field practice in archaeology varies greatly throughout the world mainly because archaeological sites survive in very different ways in different countries Many manuals see this as a problem to be defeated by the imposition of standardised procedures In this book we relish the variety of field practice seeing it rather as the way the best archaeologists have responded creatively to the challenges of terrain research objectives and the communities within which they work While insisting on the highest levels of investigation we celebrate the different designs concepts scientific detection methods and recording systems applied so embracing standards but not standardisation The book is organised in four parts Part 1 offers a summary of field procedures Part 2 reviews the principal methods applied above and below ground and how the results are analysed Part 3 illustrates the huge variety confronted by field workers with a series of exemplary commercial and academic projects enacted in downland jungle desert permafrost road schemes and towns Approaches also differ according to the traditional methodologies that have evolved in particular countries In Part 4 we give examples of some the strongest and oldest of those practised on four continents
