Literature and Music in the Atlantic World, 1767-1867 Catherine Jones, 2014-07-16 This new study looks at the relationship of rhetoric and music in the era's intellectual discourses texts and performance cultures principally in Europe and North America Catherine Jones begins by examining the attitudes to music and its performance by leading figures of the American Enlightenment and Revolution notably Benjamin Franklin and Thomas Jefferson She also looks at the attempts of Francis Hopkinson William Billings and others to harness the Orphean power of music so that it should become a progressive force in the creation of a new society She argues that the association of rhetoric and music that reaches back to classical Antiquity acquired new relevance and underwent new theorisation and practical application in the American Enlightenment in light of revolutionary Atlantic conditions Jones goes on to consider changes in the relationship of rhetoric and music in the nationalising milieu of the nineteenth century the connections of literature music and music theory to changing models of subjectivity and Romantic appropriations of Enlightenment visions of the public ethical function of music

Beethoven & Freedom Daniel K L Chua, 2017-07-18 Over the last two hundred years Beethoven's music has been synonymous with modernity's absolute value freedom Author Daniel KL Chua explores how Beethoven's music engages with freedom's aspirations and dilemmas challenging the current image of Beethoven and suggesting an alterior freedom that can speak ethically to the twenty first century

Listening to Reason Michael P. Steinberg, 2010-01-02 This pathbreaking work reveals the pivotal role of music musical works and musical culture in debates about society self and culture that forged European modernity through the long nineteenth century Michael Steinberg argues that from the late 1700s to the early 1900s music not only reflected but also embodied modern subjectivity as it increasingly engaged and criticized old regimes of power belief and representation His purview ranges from Mozart to Mahler and from the sacred to the secular including opera as well as symphonic and solo instrumental music Defining subjectivity as the experience rather than the position of the I Steinberg argues that music's embodiment of subjectivity involved its apparent

capacity to listen to itself its past its desires Nineteenth century music in particular music from a north German Protestant sphere inspired introspection in a way that the music and art of previous periods notably the Catholic baroque with its emphasis on the visual did not The book analyzes musical subjectivity initially from Mozart through Mendelssohn then seeks it in its central chapter in those aspects of Wagner that contradict his own ideological imperialism before finally uncovering its survival in the post Wagnerian recovery from musical and other ideologies Engagingly written yet theoretically sophisticated *Listening to Reason* represents a startlingly original corrective to cultural history's long standing inhibition to engage with music while presenting a powerful alternative vision of the modern Some images inside the book are unavailable due to digital copyright restrictions

The Natural Musician Dina Kirnarskaya, 2009-06-11 One of the great mysteries of music is how it affects us in multitude of ways Whether talking about our individual tastes as listeners or

individual differences as performers what are the psychological qualities that can turn some people into great musicians but not others Is it down to genes sheer hard work or some other quality in the individual The Natural Musician is the story of how we become composers performers or just discriminating listeners It searches for those psychological traits essential for turning one into a musician Unlike many others Kirnarskaya does believe in the existence of talent but argues that it is due to multiplicative factors which she describes analyses and shows how to test She also sheds light on the essence and origins of perfect pitch examines the triumphs and tortures of musical prodigies and considers the implications of her theories for the teaching of music After a foreword from the legendary conductor Gennady Rodhestvensky the book looks at our basic musical faculties how we perceive sounds distinguish their pitch and structure and recognise rhythm It then examines the nature of musical empathy what it is that allows us to perceive and emotionally connect with music The second part of the book focuses on the creative processes behind writing music The third section deals with music education looking at the role of innate and inherited characteristics in the formation of talent and considering why many who excel at an early age burn out later on The book ends exploring how musical development can shape the human brain strengthening other cognitive faculties including those unrelated to music This is a book that will fascinate anyone with an interest in music and musicians from the fields of music psychology and education to musicians themselves whether amateur and professional
