Thalma Lobel,2020-07-14 An internationally renowned psychologist shows us how overlooked factors in our work days our physical environments our unconscious habits and even traits like our faces and voices have the power to make or break our careers In *Whatever Works The Small Cues That Make a Surprising Difference in our Success at Work and How to Create a Happier Office* Thalma Lobel one of the world s leading experts on human behavior explores groundbreaking psychological research on job performance satisfaction and creativity Lobel goes beyond obvious considerations like salary title and company culture to shed light on the hidden factors often unrecognized counterintuitive or invisible that have profound effects on how well we can do our jobs and how happy we are at work Did you know that just doodling in a certain way can increase your creativity That looking at something green for forty seconds will improve your attention That crossing your legs similarly to an interviewer could get you the job That the mere presence of a smartphone on your desk can lessen your performance even if it s turned off That being in a warmer room makes you more likely to want to conform with the group affecting your decision making These are the invisible factors that nudge our behavior on a daily basis and combined have a real and significant bearing on our success or failure at work In today s competitive market where even tiny differences can be decisive for both employees and organizations exploiting such factors can make all the difference The more you know about the subtle elements that can help or hinder you on the job the better equipped you can be to take control and navigate today s competitive work world Helpful for anyone from individual employees to managers to leaders of large organizations *Whatever Works* shares valuable insights and practical takeaways to transform your professional life *Psychology,*

Religion, and Spirituality James M. Nelson,2009-02-27 Over a century ago psychologists who were fascinated with religion began to study and write about it Theologians and religious practitioners have responded to this literature producing a fascinating dialogue that deals with our fundamental und standings about the human person and our place in the world This book provides an introduction to the important conversations that have developed out of these interchanges The dialogue between psychology and religion is difficult to study for a number of reasons First it requires knowledge of both psychology and religion People with a background in psychology often lack a solid understanding of the religious traditions they wish to study and theologians may not be up to date on the latest developments in psychology Second it requires conceptual tools to organize the material and understand the basic problems involved in any attempt to connect the science of psychology with religion These concepts can be found in many places for instance in the writings of philosophers of science but they are complex and often hard to follow for those without a proper theological and philosophical ba ground Finally authors who write on the topic come to the study of psychology and religion from a variety of academic and personal backgrounds This makes for wonderful diversity in conversations but it makes understanding and mastery of the material quite difficult

a new design of genetic algorithm for bin packing ieee xplore - Sep 04 2022

web dec 12 2003 abstract in this paper a new design of genetic algorithm ga is proposed for solving the one dimensional bin packing problem which is to pack a given set of items into the minimum number of bins ga should be designed in such a way that offspring inherit important factors of parents

practical applications of bin packing using genetic algorithm - Dec 07 2022

web mar 16 2018 i am doing research on genetic algorithms for solving the bin packing problem i can understand the process now but since the final output is a set of solutions for one list of items i cannot figure out why do we need a set of solutions for one list of items when one solution should be enough

[2d bin packing problem with genetic algorithm in matlab](#) - Feb 26 2022
