Counterreformation After examining this history Kittler then addresses the ways in which images were first stored and made to move through the development of photography and film Kittler discusses the competitive relationship between photography and painting as well as between film and theater as innovations like the Baroque proscenium or picture frame stage evolved from elements that would later constitute cinema The central question however is the impact of film on the ancient monopoly of writing as it not only provoked new forms of competition for novelists but also fundamentally altered the status of books In the final section Kittler examines the development of electrical telecommunications and electronic image processing from television to computer simulations In short these lectures provide a comprehensive introduction to the history of image production which is indispensable for anyone wishing to understand the prevailing audiovisual conditions of contemporary culture
