Backtalk, Press Councils in America William L. Rivers, 1972 **Media Ethics and Accountability Systems** Claude-Jean Bertrand, 2018-04-17 Over the last few years the O J Simpson case then the Lewinsky Clinton affair and scores of minor scandals have dominated the US press often taking precedence over important domestic and international issues This tabloidization of the news media both here and abroad has proved that the market cannot insure media quality In a democracy for media to function well they must be free of both political and economic muzzling The only solution is to add self regulation or quality control by professionals and public to the other two forces the market and state regulation In this controversial volume Claude Jean Bertrand sets out to define a set of accountability systems democratic efficient and harmless to insure true freedom and quality of media This brief highly literate volume focuses not on philosophical foundations of media ethics or case stories but on what is now missing in the codes Many books deal with media ethics but few deal with accountability Media Ethics and Accountability Systems zeroes in on the many nongovernmental methods of enforcing quality control and on the difficulty of getting the media microcosm to accept such accountability To remedy this lack Bertrand proposes rethinking existing media accountability systems some 30 to 40 in number and creation of new ones He observes that existing systems are rooted in four basic approaches training the education of citizens in media use and the incorporation of ethics courses in journalistic education evaluation criticism positive and negative not only from politicians consumerists and intellectuals but from media professionals themselves monitoring by independent academic experts over extended periods of time into the long term effects and feedback giving ear to the various segments of media users and their needs and tastes rather than scrutinizing sales and ratings Media Ethics will be of particular interest to academics in the fields of communication and journalism as well as to the general reader with an interest in public issues and a civic concern for society News Ombudsmen in North America Neil Nemeth, 2003-11-30 This book offers the most comprehensive look to date at the effort of about forty U S media organizations to make themselves more accountable Nemeth provides a critical assessment of the ombudsmen s work from the ombudsmen themselves their editors media critics and scholars
