Back From The Moon:

Returning People to the Moon After Apollo Pat Norris, 2019-06-04 July 2019 marks 50 years since Neil Armstrong took his famous first steps on the surface of the Moon. As people around the world celebrate the anniversary of this great American achievement, they might wonder why there have been no further human missions to the Moon since Apollo 17 in 1972. This book assesses the legacy of the Apollo missions based on several decades of space developments since the program's end. The question of why we haven't sent humans back to the Moon is explored through a multidisciplinary lens that weaves together technological and historical perspectives. The nine manned Apollo missions, including the six that landed on the Moon, are described here by an author who has 50 years of experience in the space industry and whose work spanned the Apollo 8-13 missions. The final section of the book provides a comprehensive assessment of today's programs and current plans for sending humans to the Moon.

Return to the Moon David Jefferis, Mat Irvine, 2007 After NASA put a man on the Moon, the space program switched gears and concentrated on other areas of exploration and research. What if we were to return to the Moon today? *Return to the Moon* asks and answers many questions about future space travel to the Moon and its possible colonization.

Records Geological Survey of Victoria, 1917 The North American Indian: The Yakima, The Klickitat, Salishan tribes of the interior. The Kutenai Edward S. Curtis, 1911 A comprehensive and permanent record of all the important tribes of the United States and Alaska that still retain to a considerable degree their primitive customs and traditions. The value of such a work in great measure will lie in the breadth of its treatment, in its wealth of illustration, and in the fact that it represents the result of personal study of a people who are rapidly losing the traces of their aboriginal character and who are destined ultimately to become assimilated with the superior race. It has been the aim to picture all features of the Indian life and environment, types of the young and the old, with their habitations, industries, ceremonies, games, and everyday customs. Though the treatment accorded the Indians by those who lay claim to civilization and Christianity has in many cases been worse than criminal, a rehearsal of these wrongs does not properly find a place here.

The Seventh Landing Michael Carroll, 2009-08-15 It's been thirty-five years since people last trod the dusty plains of the Moon. Over the course of six landings from 1969 to 1972, twelve men explored, four wheeled, dug, and hiked across the lunar surface. Now NASA has plans for a seventh landing on the Moon. This time they want to stay. NASA's plans, dubbed the Constellation architecture, involve the largest launch vehicle ever built, new types of propulsion, and a six-person vehicle to ferry crews from Earth to the Moon. But NASA's plans go far beyond Luna. Eventually, the lessons learned on the Moon's outpost at Shackleton Crater will teach us how to live permanently on the most Earthlike world in our solar system, Mars. NASA will have company: plans for future lunar exploration are being drawn by Europe, Japan, China, and India. While specific hardware and mission details will be in flux for some time, the overarching goals, strategies, and inspiration for the seventh landing will not change. This book will choose a typical scenario for getting to the Moon that embraces the spirit of

exploration embodied by NASA's Constellation architecture Each chapter moves from a general description to the specific nuts and bolts of engineering and science The Seventh Landing reveals the very latest strategies for how we'll get to the Moon what we know today what we want to find out and what life will be like at the first true outposts on the Moon and Mars

The Unbegotten John Creasey, 2012-11-25 The human race is experiencing a slow death as the population ages but no babies are being born Emissaries from outer space are the cause but this is unknown and they are attempting to prevent Dr Palfrey discovering the truth Once again he is faced with the need to save the world this time from a megalomaniac takeover by The Master

Back to the Moon Travis S. Taylor, Les Johnson, 2010-12-01 THE SECOND TIME AROUND IS HARDER Decades after the last footprints were left on the Moon the U S was preparing to return to the Lunar surface in a new class of rockets when the mission suddenly became much more urgent It would have to be a rescue mission Unbeknownst to the rest of the world China had sent its own Lunar expedition A manned expedition Until a distress call was received no human outside of China even knew that the mission was manned or that their ship had crash landed and couldn't take off again Time was running out and if the four Chinese astronauts were to be rescued the American lunar mission would have to launch immediately with only a skeleton crew Once the heroic U S astronauts were underway the army of engineers and scientists back home had the daunting task of deciding what equipment could be left on the Moon to permit the Lunar lander vehicle to lift safely from the Moon with the two U S astronauts and the four stranded Chinese taikonauts Could the U S mount such a mission successfully and would thousands of years of instilled honor allow the Chinese astronauts to accept a rescue At the publisher's request this title is sold without DRM Digital Rights Management
