Photography Miles Orvell,2003 150 years of American photography come alive in this exciting new book placing it in its cultural context for the first time Orvell examines this fascinating subject through a wide range of well known and less well known images He ranges from portraiture and landscape photography family albums and memory and analyses the particularly American way in which American photographers have viewed the world around them Orvell combines a clear overview of the changing nature of photographic thinking and practice in this period with an exploration of key concepts The result is the first coherent history of American photography which examines issues such as the nature of photographic exploitation experimental techniques the power of the photograph to shock and whether we should subscribe to the notion of a visual history *Department of the Interior and Related Agencies Appropriations for 1998: Justification of the budget estimates, Indian Health Service* United States. Nineteenth-Century Photographs and Architecture Micheline Nilsen, 2017-07-05 Eschewing the limiting idea that nineteenth century architecture photography merely reflects functionality the objective of this collection is to reflect the aesthetic intellectual and cultural concerns of the time The essays hold appeal for social and cultural historians as well as those with an interest in the fields of art history urban geography history of travel and tourism Nineteenth century photographers captured what could be seen and what they wanted to be seen Their images informed of exploration progress heritage and destruction Architecture was a staple subject for the first generation of photographers as it patiently tolerated the long exposures of the early processes During its formative decades photography responded to evolutionary cultural forces of market and artistic production Photographs of architecture reflected a specific political or social context modulated through individual points of view For this reason the examination of each photographic image as a primary visual document and an aesthetic object rather than a technical milestone on a chronological trajectory affords a richer multi faceted approach to the extensive and complex corpus of photographs taken by photographers all over the world This project acknowledges the importance of technique in the early decades of photography but focuses on the thematic content of the material It places the photography of architecture in an international context under the contemporary critical lens sharpened by theoretical and cultural examinations of the topic
