American Practical Navigator:

American Practical Navigator Nathaniel Bowditch, 1914 The American Practical Navigator National Geospatial-Intelligence Agency, 2013-06-04

The American Practical Navigator first published in 1802 was billed as the epitome of navigation by its original author Nathaniel Bowditch an early American mathematician who is often considered the founder of modern maritime navigation. The text often colloquially referred to simply as Bowditch has evolved with the advances in navigation practices since that first issue and continues to serve as a valuable reference for marine navigation in the modern day. In the more than 210 years since Bowditch first published it there have been an estimated million copies in print over the course of more than fifty editions. This latest edition fully updated by the U S government to reorganize the topics delete obsolete text and incorporate the extensive changes in navigation that have occurred in the electronic age remains popular with sailors of all types is carried onboard every commissioned U S Navy vessel and belongs in every navigator's library. The American Practical Navigator describes in detail the principles and factors of navigation including piloting electronic navigation celestial navigation mathematics safety oceanography and marine meteorology. It also contains a maritime glossary and dozens tables used in typical navigational calculations and solutions including the formulas used to derive the tabular data. Bowditch is a must have book for every mariner.

The American Practical Navigator Vol 2

Nathaniel Bowditch, National Agency, 2017-12-18

This is the completely NEW EDITION of The American Practical Navigator Vol 2. I am honored to welcome you to the 2017 edition of Publication No 9 The American Practical Navigator or as most mariners refer to it Bowditch. As a young Surface Warfare Officer serving in my first ship I quickly learned Bowditch should be my first resource for all things related to navigation oceanography and meteorology. I never imagined that 25 years later I would be privileged to lead the team entrusted with updating this incredible document. One can hardly imagine the time effort and pressure involved in undertaking such a task this is Bowditch after all. None of us alone can equal the talent experience and skill of Nathaniel Bowditch as expressed in his first edition of 1802. As a result this edition is the outcome of countless hours of hard work by many dedicated passionate and skilled colleagues from a variety of disciplines. And it was this team of scientific and operational navigation experts led by Dr Jerry Clifford which has created this contemporary edition that stands ready to address the challenges faced by today's navigators and mariners. Please take the time to read the long list of contributors to this edition. I know you will be impressed by the depth and quality of our team. Since the last edition there have been huge advancements in positioning methodologies and navigation systems. In some cases what was old is new again so we focused considerable effort into improving the celestial navigation and piloting chapters. Hand plotting latent fixes on paper charts has been overtaken by Electronic Chart Display and Information Systems that continuously tell you where you are provide warnings when standing into danger and display radar and Automatic Identification System information to heighten situational awareness. Older graphics have been replaced by newer higher resolution images to

better illustrate the purpose of the text Needless to say we are justifiably proud of this 2017 edition and equally honored to continue such a noteworthy legacy of the navigational expertise first introduced by Nathaniel Bowditch 215 years ago
Wherever you may sail I trust this fine resource will assure your safe passage I wish you all fair winds and following seas
