Revised and Expanded outlines and demonstrates basic logo and branding design guidelines and rules through 100 principles. These include the elements of a successful graphic identity, identity programs and brand identity and all the various strategies and elements involved. A company's identity encompasses far more than just its logo. Identity is crucial to establishing the public's perception of a company, its products and its effectiveness, and it's the designer's job to envision the brand and create what the public sees. *Brand Identity Essentials*, a classic design reference now updated and expanded, lays a foundation for brand building, illustrating the construction of strong brands through examples of world-class design. Topics include: A Sense of Place, Cultural Symbols, Logos as Storytellers, What is On Brand, Brand Psychology, Building an Online Identity, Managing Multiple Brands, Owning an Aesthetic Logo, Lifecycles, Programs That Stand Out, Promising Something and Honesty is Sustainable. The new revised edition expands each of the categories, descriptions and selections of images and incorporates emergent themes in digital design and delivery that have developed since the book first appeared. *Brand Identity Essentials* is a must-have reference for budding design professionals and established designers alike.

Strategic Market Management David A. Aaker, Damien McLoughlin, 2010. The text is a European adaptation of our current US book *Strategic Market Management*, 9th Edition by David Aaker. This new edition is a mainstream text suitable for all business students studying strategy and marketing courses. *Strategic Market Management: Global Perspectives* is motivated by the strategic challenges created by the dynamic nature of markets. The premise is that all traditional strategic management tools either do not apply or need to be adapted to a more dynamic context. The unique aspects of the book are its inclusion of: A business strategy definition that includes product, market, scope, value proposition and assets and competences; A structured strategic analysis including a detailed customer, competitor, market and environmental analysis leading to understanding of market dynamics that is supported by a summary flow diagram, a set of agendas to help start the process and a set of planning forms; Concepts of strategic commitment, opportunism and adaptability and how they can and should be blended together; Bases of a value proposition and strong brands. A strategy without a compelling value proposition will not be market-driven or successful. Brand assets that will support a business strategy need to be developed. Creating synergetic marketing with silo organisations defined by products or countries. All organisations have multiple products and markets and creating cooperation and communication instead of competition and isolation is becoming an imperative. A global perspective is an essential aspect of this new edition. This reflects the lived experience of the student reader but also their likely professional challenges. This is achieved by the extensive use of new examples and vignettes.
