Brain Maps Larry W. Swanson, 2004 The core of this book is an atlas of the rat brain viewed from 73 representative transverse levels along its longitudinal axis New to this edition is a second drawing of gray and white matter distribution that illustrates major features of gray matter regionalization in a color coded way that is carried through the flatmaps of the rat CNS and the hierarchical nomenclature tables Computer graphics files of the atlas and flatmaps are provided on the CD ROM They can be used to learn more about the structure of the brain to map experimental results on standard or reference templates to form databases of spatial information about the rat brain and to create 3 D models

Brain Maps Larry W. Swanson, 1998 This set can be used for producing and publishing rat brain illustrations

Developmental Brain Maps Gonzalo Alvarez-Bolado, Larry W. Swanson, 1996 This book is a companion to the atlas of the adult rat brain *Brain Maps Structure of the Rat Brain* Elsevier 1992 using a consistent approach to nomenclature and graphical representation The two goals of the approach used for the book are to clarify the basic structural plan of the mammalian brain and to generate computer graphics maps for summarizing related information using the rat as a particular model Included is also a discussion of how similar the development of rat and mouse brains may be and thus how useful the maps may be as a guide to mouse brain development The heart of the book is of course the atlases of the brain at progressive stages of embryogenesis Nine representative ages are used from the simple neural plate stage to a time just before birth At each stage enough levels are presented to illustrate the major known structural features with additional supporting planes and photomicrographs The second component of the book discusses the classical approach to interpreting the gross structure of the developing brain while a third component is more theoretical and deals with methods to produce flattened maps or footprints of the central nervous system Finally problems associated with identifying specific structures in the embryonic brain and the many inconsistencies found in nomenclature associated with the developing and adult rat brain are presented
