13th International Conference On Pipeline Protection:

13th International Conference on Computational Intelligence in Security for Information Systems (CISIS 2020) Álvaro Herrero, Carlos Cambra, Daniel Urda, Javier Sedano, Héctor Quintián, Emilio Corchado, 2020-08-27 This book contains accepted papers presented at CISIS 2020 held in the beautiful and historic city of Burgos Spain in September 2020. The aim of the CISIS 2020 conference is to offer a meeting opportunity for academic and industry related researchers belonging to the various vast communities of computational intelligence information security and data mining. The need for intelligent flexible behaviour by large complex systems especially in mission critical domains is intended to be the catalyst and the aggregation stimulus for the overall event. After a thorough peer review process the CISIS 2020 International Program Committee selected 43 papers which are published in these conference proceedings achieving an acceptance rate of 28%. Due to the COVID 19 outbreak the CISIS 2020 edition was blended combining on site and on line participation. In this relevant edition a special emphasis was put on the organization of five special sessions related to relevant topics as Fake News Detection and Prevention Mathematical Methods and Models in Cybersecurity Measurements for a Dynamic Cyber Risk Assessment Cybersecurity in a Hybrid Quantum World Anomaly Intrusion Detection and From the least to the least cryptographic and data analytics solutions to fulfil least minimum privilege and endorse least minimum effort in information systems. The selection of papers was extremely rigorous in order to maintain the high quality of the conference and we would like to thank the members of the Program Committees for their hard work in the reviewing process. This is a crucial process to the creation of a high standard conference and the CISIS conference would not exist without their help. **ICCWS 2018**
