The seventh Annual Bank Conference on Development Economics in Europe was held in Amsterdam, the Netherlands, May 23-24, 2005. The conference was co-organized by the Government of the Netherlands. The theme of the conference was **Securing Development in an Unstable World**. The conference opened with remarks by Jean-François Rischard, the World Bank's Vice President for Europe, and Agnes van Ardenne van der Hoeven, Minister for Development Cooperation, the Netherlands. Their remarks were followed by keynote addresses by Franis Bourguignon, Chief Economist and Senior Vice President of the World Bank; Hisashi Owada, Judge, International Court of Justice and former Vice Minister for Foreign Affairs, Japan; Gerrit Zalm, Minister of Finance, the Netherlands; and Ernesto Zedillo, former President of Mexico and Director, Yale Center for the Study of Globalization, Yale University. Three papers on macroeconomic vulnerability, vulnerability: a micro perspective, and health risks were then presented.

This comprehensive and accessible book examines the evolution of the multilateral trade regime in the ever-changing global economic environment, particularly during the WTO era and the

connor,2006 *Aid from International NGOs* Dirk-Jan Koch,2009-02-03 International NGOs are increasingly important players within the new aid architecture but their geographic choices remain uncharted territory This book focuses on patterns of development assistance mapping while analysing and assessing the country choices of the largest international NGOs Koch s approach is interdisciplinary and uses qualitative quantitative and experimental methods to provide a clear insight in the determinants of country choices of international NGOs The book aims to discover the country choices of international NGOs how they are determined and how they could be improved This work which uses a dataset created specifically for the research comes to the conclusion that international NGOs do not target the poorest and most difficult countries They are shown to be focussing mostly on those countries where their back donors are active Additionally it was discovered that they tend to cluster their activities for example international NGOs also have their donor darlings and their donor orphans Their clustering is explained by adapting theories that explain concentration in for profit actors to the non profit context The book is the first on the geographic choices of international NGOs and is therefore of considerable academic interest especially for those focusing on development aid and third sector research Furthermore the book provides specific policy suggestions for more thought out geographic decisions of international NGOs and their back donors
