Reinterpreting Sub-Saharan Cities through the Concept of Adaptive Capacity Liana Ricci, 2015-12-30 This book explores whether and how a reinterpretation of Sub Saharan cities through the concept of adaptive capacity could bridge this distance and contribute to a new understanding of the contemporary city The research contributes to improved knowledge of urban and environmental planning and of the dynamics of development and environmental management in peri urban areas of Dar es Salaam This knowledge highlights the limits of certain common generalizations on the character of peri urban areas Moreover the research provides methodological contribution derived from considerations on the strengths and weakness of tools and methods for investigating adaptive capacity and for environmental management in the city of Dar es Salaam Finally it highlights controversial issues and possible research paths related to the relationship between adaptive capacity and urban and environmental planning

The Theory of Ecology Samuel M. Scheiner, Michael R. Willig, 2011-07-15 Despite claims to the contrary the science of ecology has a long history of building theories Many ecological theories are mathematical computational or statistical though and rarely have attempts been made to organize or extrapolate these models into broader

theories The Theory of Ecology brings together some of the most respected and creative theoretical ecologists of this era to advance a comprehensive conceptual articulation of ecological theories The contributors cover a wide range of topics from ecological niche theory to population dynamic theory to island biogeography theory Collectively the chapters ably demonstrate how theory in ecology accounts for observations about the natural world and how models provide predictive understandings It organizes these models into constitutive domains that highlight the strengths and weaknesses of ecological understanding This book is a milestone in ecological theory and is certain to motivate future empirical and theoretical work in one of the most exciting and active domains of the life sciences
