Physical Methods in

Heterocyclic Chemistry A. R. Katritzky, 2013-10-22 Physical Methods in Heterocyclic Chemistry Volume IV discusses the

application of physical methods to organic chemistry and in particular to heterocyclic chemistry Since the publication in 1963 of the first two volumes of this treatise the application of physical methods to organic chemistry and in particular to heterocyclic chemistry has proceeded apace The importance of physical methods to structure determination and to the understanding of inter and intramolecular interactions has increased no less than the flood of new work Heterocyclic chemists are thus faced with the necessity of having more to comprehend for the efficient execution of their own work The present volume includes chapters on electric dipole moments and heteroaromatic reactivity which originally appeared in Volume I and chapters on nuclear quadrupole resonance nuclear magnetic resonance and infrared spectra which originally formed part of Volume II Also included is one new topic dielectric absorption Nuclear Magnetic Resonance R J Abraham, 2007-10-31 As a spectroscopic method Nuclear Magnetic Resonance NMR has seen spectacular growth over the past two decades both as a technique and in its applications Today the applications of NMR span a wide range of scientific disciplines from physics to biology to medicine Each volume of Nuclear Magnetic Resonance comprises a combination of annual and biennial reports which together provide comprehensive of the literature on this topic This Specialist Periodical Report reflects the growing volume of published work involving NMR techniques and applications in particular NMR of natural macromolecules which is covered in two reports NMR of Proteins and Acids and NMR of Carbohydrates Lipids and Membranes For those wanting to become rapidly acquainted with specific areas of NMR this title provides unrivalled scope of coverage Seasoned practitioners of NMR will find this an invaluable source of current methods and applications Specialist Periodical Reports provide systematic and detailed review coverage in major areas of chemical research Compiled by teams of leading authorities in the relevant subject areas the series creates a unique service for the active research chemist with regular in depth accounts of progress in particular fields of chemistry Subject coverage within different volumes of a given title is similar and publication is on an annual or biennial basis
