Animals At Home:

Home Ranges of Animals Roger A. Powell, 2025-10-21 Animals have tremendous agency to understand the world around them and to plan how to take best advantage of that world to meet their requirements Their perception of the world differs from humans and includes knowledge emphasizing different senses This book argues that to understand animals home ranges which are integral to the behavior and ecology of animals biologists must understand their cognition of their environments Presenting diverse complementary approaches to studying home ranges this book shows how using multiple approaches sheds a broad light on how and why animals behave as they do The book also provides many examples showing how hypothesis driven research provides strong insights into animal behavior and ecology [Animals at Home](#) Jane Burton, *Animal Ways* 1 of 4, 1991 Photographs by Jane Burton and Kim Taylor [Animal Housing and Human-Animal Relations](#) Kristian Bjørkdahl, Tone Druglitrø, 2016-05-12 This book provides an in depth investigation into the practices of animal housing systems with international contributions from across the humanities and social sciences By attending to a range of different sites such as the zoo the laboratory the farm and the animal shelter to name a few the book explores material technologies from the perspective that these are integrated parts of a larger biopolitical infrastructure and questions how animal housing systems and the physical infrastructures that surround central human animal practices come into being Chapter 11 of this book is freely available as a downloadable Open Access PDF at <http://www.taylorfrancis.com> under a Creative Commons Attribution Non Commercial No Derivatives CC BY NC ND 3.0 license [Animals at Home](#) Craig M. Brown, 1996-04-01 Illustrated with his trademark simplicity humor and warmth Brown takes young readers on a delightful tour of animals homes Ages 3-7 **Resource Selection by Animals** B.F. Manly, L. McDonald, D.L. Thomas, Trent L. McDonald, Wallace P. Erickson, 2007-05-08 We have written this book as a guide to the design and analysis of field studies of resource selection concentrating primarily on statistical aspects of the comparison of the use and availability of resources of different types Our intended audience is field ecologists in general and in particular wildlife and fisheries biologists who are attempting to measure the extent to which real animal populations are selective in their choice of food and habitat As such we have made no attempt to address those aspects of theoretical ecology that are concerned with how animals might choose their resources if they acted in an optimal manner The book is based on the concept of a resource selection function RSF where this is a function of characteristics measured on resource units such that its value for a unit is proportional to the probability of that unit being used We argue that this concept leads to a unified theory for the analysis and interpretation of data on resource selection and can replace many ad hoc statistical methods that have been used in the past [Political Animals](#) Jesse Donahue, Erik Trump, 2007-01-01 *Political Animals* offers a unique study and perspective on the relationship between politics and the art found in American zoos and aquariums Jesse Donahue and Erik Trump examine the ways that zoos and aquariums have successfully served as sculptural gardens for the masses and have incorporated art and

architecture that convey political messages about both the patrons and the animals This book demonstrates how art has been used for a range of economic and political purposes including providing jobs a medium to reach out to minority interest groups a fundraising tool and a surrogate for the animals themselves Donahue and Trump skillfully analyze and compare zoos to other areas of public art to highlight the calculated strategies on the part of the zoos that have incorporated a range of artistic styles for different audiences Incorporating photographs of zoo and aquarium art from around the country Political Animals is an exciting and captivating text for the mind and eye **Animal Homes: Read Along or Enhanced eBook**

Dona Herweck Rice,2024-02-13 Every animal has a home and each home is unique This brightly illustrated book introduces young learners to some of the places that are home to animals New readers will build foundational reading skills with this book that has images that work together with the text to support early childhood literacy Animal Homes Guided Reading 6-Pack,2019-08-15 **Progress in Agricultural Education** United States. Crosby,1907 Carnivore Ecology and Conservation Luigi Boitani,Roger A. Powell,2012-01-12 Animals that must hunt and kill for at least part of their living are inherently interesting to many people and the role that carnivores play in biological communities attract interest from ecologists and conservation biologists Conflicts with human activities stimulate continual debates about the management of carnivore populations and throughout the world people seek workable solutions for human carnivore coexistence This concise yet authoritative handbook describes research methods and techniques for the study and conservation of all terrestrial carnivore species Particular attention is paid to techniques for managing the human carnivore interface Descriptions of the latest methodologies are supported by references to case studies whilst dedicated boxes are used to illustrate how a technique is applied to a specific land cover type species or particular socio economic context The book describes the most recent advances in modelling the patterns of animal distributions movements and use of land cover types as well as including the most efficient methods to trap handle and mark carnivores Carnivores are biogeographically diverse and whilst extensive scientific research has investigated many aspects of carnivore biology not all species have been equally covered This book is unique in its intention to provide practical guidance for carrying out research and conservation of carnivores across all species and areas of the world
