It remains the only reference to cover the entire scope of animal rights and welfare from a global interdisciplinary perspective with an international team of contributors assembled by Marc Bekoff covering animal treatment issues in the United States, China, India, Kenya, Australia and many other nations. With a focused emphasis on fairness and justice for animals evident on every page *Encyclopedia of Animal Rights and Animal Welfare* Second Edition offers clear explanations of hot button topics like puppy mills, endangered species in zoos, no kill shelters, dog fighting, factory farming and disease, veganism, conservation ethics, wildlife contraception and more. The encyclopedia also explores a range of religious, ethical and philosophical views on using animals as well as the latest research on animal cognition and sentience. The work helps readers understand the different viewpoints of animal welfare advocates who want to improve conditions for animals and animal rights activists who don't want animals used at all.

Australia's Lost World Michael Archer,Suzanne

Hand,Suzanne J. Hand,Henk Godthelp,2000 In Queensland in northeast Australia lies one of the most significant fossil deposits in the world, Riversleigh. Here the remains of many thousands of weird and wonderful prehistoric animals have been superbly preserved in the limestone outcrops. There are marsupial lions, carnivorous kangaroos, 23 foot long pythons, primitive platypuses and early ancestors of the now extinct Tasmanian tiger. So important is this site to our understanding of what has happened to Australia and its living cargo over the last 25 million years that Riversleigh has been inscribed on the World Heritage List. Michael Archer, Suzanne J. Hand and Henk Godthelp, the principal scientists on a remarkable excavation since 1976, explain the vast environmental and geographic changes that have occurred in this area since Australia broke away from the supercontinent of Gondwana and how the animals on board this continental raft evolved through the ages. Photographs and evocative artwork bring to life the teeming tropical world that once existed in the now arid wastes of Riversleigh and the authors discuss some of the unusual techniques used on a dig. They describe how to recognize fossils, how to date them and how to reconstruct extinct animals from them. Originally published as *Riversleigh: The Story of Animals in Ancient Rainforests of Inland Australia*, this award winning book is being issued for the first time in the United States.
