protons, electrons, phosphorylation and active transport , Chloride Transport in Biological Membranes Jose Zadunaisky,2012-12-02 Chloride Transport in Biological Membranes is a collection of papers that present advances and the state of knowledge in the transport of chloride and other anions across biological membranes The book includes papers that discuss topics such as the anion transport protein functional sites of the red cell anion exchange protein and anion and proton transport through lipid bilayers Also covered in the book are chloride transport in certain areas such as the renal tubule the gastric mucosa and the cornea the role of sodium in anion transport chloride reabsorption and the hormonal control of chloride secretion The text is recommended for biologists biochemists and practitioners in health science especially those who would like to know more about the processes involved in chloride transport Ionic Transport in Hypertension Ricardo Garay,Antonio Coca,2019-06-04 First Published in 1994 Ionic Transport in Hypertension is devoted to examining the hypothesis that essential hypertension is a heterogeneous disease in its pathophysiological mechanisms as well as in its clinical and therapeutic considerations *Transport And Diffusion Across Cell Membranes* Wilfred Stein,2012-12-02 Transport and Diffusion across Cell Membranes is a comprehensive treatment of the transport and diffusion of molecules and ions across cell membranes This book shows that the same kinetic equations with appropriate modification can describe all the specialized membrane transport systems the pores the carriers and the two classes of pumps The kinetic formalism is developed step by step and the features that make a system effective in carrying out its biological role are highlighted This book is organized into six chapters and begins with an introduction to the structure and dynamics of cell membranes followed by a discussion on how the membrane acts as a barrier to the transmembrane diffusion of molecules and ions The following chapters focus on the role of the membrane s protein components in facilitating transmembrane diffusion of specific molecules and ions measurements of diffusion through pores and the kinetics of diffusion and the structure of such pores and their biological regulation This book methodically introduces the reader to the carriers of cell membranes the kinetics of facilitated diffusion and cotransport systems The primary active transport systems are considered emphasizing the pumping of an ion sodium potassium calcium or proton against its electrochemical gradient during the coupled progress of a chemical reaction while a conformational change of the pump enzyme takes place This book is of interest to advanced undergraduate students as well as to graduate students and researchers in biochemistry physiology pharmacology and biophysics **Current Topics in Membranes and Transport** ,1988-09-01 Current Topics in Membranes and Transport **Cumulated Index Medicus** ,1980 **Plant Vacuoles** B. Marin,2013-03-09 The papers in this book illustrating the present status of knowledge related to the vacuolar compartment of fungi and plants were presented at an Advanced Research Workshop entitled Plant Vacuoles Their Importance in Plant Cell Compartmentation and their

Applications in Biotechnology held in Sophia Antipolis France on July 6 11 1986 The organizers were fortunate in being able to assemble representative leaders of all the above fields of research concerning this compartment These scientists from all over the world were invited to present their latest results and to exchange views and plans for continued research in this highly exciting field which is very important for the improving the industrial aspect of plant biotechnology related to the production of molecules with a high added value To ensure maximal flexibility and opportunity for discussion the chairmen of the various sessions were asked to introduce their respective topics after which they were given the freedom of organizing their sessions in a more or less improvised fashion with brief presentations of relevant new information by participants following a schedule fixed relatively shortly before the workshop This procedure proved to be highly successful giving rise to most productive and stimulating discussions among the representatives of the various fields
