Annals Of Theoretical Psychology:

Annals of Theoretical Psychology Hans van Rappard, Pieter J. van Strien, Leendert P. Mos, William J. Baker, 2013-11-11
This volume and its companion to be published as Volume 9 in the Annals series had their origin in a visit by the first editor to our Center in 1983 a year prior to our initiating publication of the Annals. Some three years later Hans Rappard formally proposed to edit together with the historian of psychology in the Netherlands Pieter van Strien an Annals volume devoted to history and theory. Rappard emphasized however that it was to be not just a volume on the relation between history of psychology and theoretical psychology but rather a volume on the relevance of history to theory or psychology in general. In other words how and what could doing history contribute to theoretical problems that face contemporary psychology. Another four years passed before commitments from the twenty seven contributors were received. The plan was to publish a single volume devoted to history and theory however the length of six major papers, eighteen commentaries and replies to commentaries necessitated a decision to publish the manuscript in two volumes. It was not an easy decision especially as the contributors and editors had achieved an integrity of theme and content that is unusual for edited volumes. Moreover in view of the manuscript's long past we felt little inclination to extend its history. **Annals of Theoretical Psychology** Leendert Mos, 2012-12-06. Some one hundred years ago the founding fathers optimistically launched psychology as a science. The premise was that the new science must break away from its parental ties to philosophy and confine itself to gathering data preferably in the psychology laboratory. There is little doubt that this early commitment to an observation and accumulation of data only policy was helpful in the launching of the new science. Some idea of how critical this move to empiricism was can be gathered from the following quotation taken from Wolman 1973 p 32. It was not an easy task to transform the old mental philosophy into a natural science. Natural science used observation and experimentation they observed their subject matter as it were from without. Wundt's psychology was supposed to study observable stimuli and responses but there was so much that was unobservable in psychology. Although the launching was eventually a success there is little doubt that the high hopes of the founding fathers have not materialized. Annals of Theoretical Psychology Leendert Mos, 1984-02-01.

Annals of Theoretical Psychology K.B. Madsen, Leendert P. Mos, 2013-11-11. As a follow up to Volume 7 contributors continue to explore the latest developments in developmental psychology. Here researchers focus on the integration of theory and research and evaluate theoretical progress and advanced research. Continuing with the successful format of previous volumes in *Annals of Theoretical Psychology* Volume 10 presents four major contributions each accompanied by commentaries and replies to commentaries. **Annals of Theoretical Psychology. -- Vol. 1**, 1984. **Annals of Theoretical Psychology** Joseph R. Royce, Leendert Mos, 2013-07-01. As such things happen several manuscripts in the present volume were under review prior to the ones that appeared in Volume I of the Annals. A major difficulty encountered in the preparation of these volumes apart from working up to three years in advance of publication is eliciting appropriate

commentary If this format is to succeed the commentary must be both engaging to the reader and satisfying to the author It is not yet clear how successful we have been in this regard and indeed we do not feel bound to publish commentary with each manuscript that is accepted for publication Nevertheless we do invite readers commentaries on published materials The contributions by Jan Smedslund and Benjamin Wolman in this volume have been through an inordinately long publication lag We have been in receipt of both manuscripts since early in 1981 and Dr Smedslund especially has since clarified and advanced his views else where in print K B Madsen and Joseph Rychlak submitted their manuscripts in the fall of 1981 while Michael Hyland and J Philippe Rushton had first drafts of their manuscripts accepted for publication in the fall of 1982 We are grateful to our contributors for their expressed commitment to the Annals and assure potential contributors that the delay in publication is a mere matter of getting the series off the ground

Annals of Theoretical Psychology Daniel N. Robinson, Leendert Mos, 1990 Early in 1986 I invited Professor Robinson to collaborate on a volume of the Annals devoted to the theme of the person in psychology He accepted my invitation later that year suggesting instead that the volume be devoted to the theme of explanation in psychology I gladly compromised for as I knew from his extensive writings on the history and philosophy of psychology the concept of explanation is firmly rooted in philosophical anthropology The contributions by Rom Harré, James Lamiell, Joseph Margolis and George Miller were available in June 1988 and the commentaries and replies to commentaries early in 1989 Fortunately foundational papers wear well as the content of the present volume so aptly testifies Beginning with Volume 6 the Annals will be entirely edited and prepared using the computer facilities at our Center Thanks to the dedicated effort of my colleague Professor William Baker this is the first volume produced from camera ready copy His personal support and technical expertise made the transition to desk top publishing somewhat less than formidable Mrs Valerie Welch our Center secretary entered the text and managed my personal correspondence Casey Boodt proofread the entire manuscript and the University of Alberta continues to support my involvement with this series Dan Robinson's commitment to scholarship also extends to the more mundane task of editing Every volume with a co editor is a challenge he made this one a delight

The Catalyzing Mind Kenneth R. Cabell, Jaan Valsiner, 2013-11-11 How do we understand and explain phenomena in psychology What does the concept of causality mean when we discuss higher psychological functions and behavior Is it possible to generate laws in a psychological and behavioral science laws that go beyond statistical regularities frequencies and probabilities An international group of authors compare and contrast the use of a causal model in psychology with a newer model the catalytic model The Catalyzing Mind Beyond Models of Causality proposes an approach to the qualitative nature of psychological phenomena that focuses on the psychological significance and meaning of conditions contexts and situations as well as their sign mediating processes Contributors develop, apply and criticize the notion of a catalyzing mind in hopes of achieving conceptual clarity and rigor Disciplines such as philosophy, psychology, semiotics and biosemiotics are used for an interdisciplinary approach to the book

Research topics such as history and national identity immigration and transitions to adulthood are all brought into a dialogue with the concept of the catalyzing mind With a variety of disciplines theoretical concepts and research topics this book is a collective effort at an approach to move beyond models of causality for explaining and understanding psychological phenomena

The Scientific Study of General Intelligence Helmuth Nyborg, 2003-07-11 This book celebrates two triumphs in modern psychology the successful development and application of a solid measure of general intelligence and the personal courage and skills of the man who made this possible Arthur R Jensen from Berkeley University The volume traces the history of intelligence from the early 19th century approaches to the most recent analyses of the hierarchical structure of cognitive abilities and documents the transition from a hopelessly confused concept of intelligence to the development of an objective measure of psychometric g The contributions illustrate the impressive power g has with respect to predicting educational achievement getting an attractive job or social stratification The book is divided into six parts as follows Part I presents the most recent higher stream analysis of cognitive abilities Part II deals with biological aspects of g such as research on brain imaging glucose uptake working memory reaction time inspection time and other biological correlates and concludes with the latest findings in g related molecular genetics Part III addresses demographic aspects of g such as geographic race and sex differences and introduces differential psychological aspects as well Part IV concentrates on the g nexus and relates such highly diverse topics as sociology genius retardation training education jobs and crime to g Part V contains chapters critical of research on g and its genetic relationship and also presents a rejoinder Part VI looks at one of the greatest contemporary psychologists Professor Emeritus Arthur R Jensen as teacher and mentor

Constraints of Agency Craig W. Gruber, Matthew G. Clark, Sven Hroar Klempe, Jaan Valsiner, 2014-11-03 This book explores the basic concept of agency and develops it further in psychology using it to better understand and explain psychological processes and behavior More importantly this book seeks to put an emphasis on the role of agency in four distinct settings history of psychology neuroscience psychology of religion and sociocultural theories of co agency In Volume 12 of the Annals of Theoretical Psychology the contributors explore a number of new ways to look at agency in psychology This volume seeks to develop a systematic theory of axioms for agency It describes implications for research and practice that are founded on an understanding of the person as an actor in the world This book also has implications for research and practice across psychology's sub fields uniting the discipline through an agentic view of the person
