Sancho de Salas, 2003-10-29 The volume develops the foundations of differential geometry so as to include finite dimensional spaces with singularities and nilpotent functions at the same level as is standard in the elementary theory of schemes and analytic spaces The theory of differentiable spaces is developed to the point of providing a handy tool including arbitrary base changes hence fibred products intersections and fibres of morphisms infinitesimal neighbourhoods sheaves of relative differentials quotients by actions of compact Lie groups and a theory of sheaves of Fréchet modules paralleling the useful theory of quasi coherent sheaves on schemes These notes fit naturally in the theory of C^∞ rings and C^∞ schemes as well as in the framework of Spallegk's C^∞ standard differentiable spaces and they require a certain familiarity with commutative algebra sheaf theory rings of differentiable functions and Fréchet spaces **Mathematical Logic** Joseph R. Shoenfield, 2018-05-02 This classic introduction to the main areas of mathematical logic provides the basis for a first graduate course in the subject It embodies the viewpoint that mathematical logic is not a collection of vaguely related results but a coherent method of attacking some of the most interesting problems which face the mathematician The author presents the basic concepts in an unusually clear and accessible fashion concentrating on what he views as the central topics of mathematical logic proof theory model theory recursion theory axiomatic number theory and set theory There are many exercises and they provide the outline of what amounts to a second book that goes into all topics in more depth This book has played a role in the education of many mature and accomplished researchers Theory and Applications of Nonlinear Operators of Accretive and Monotone Type Athanass Kartsatos, 1996-03-14 This work is based upon a Special Session on the Theory and Applications of Nonlinear Operators of Accretive and Monotone Type held during the recent meeting of the American Mathematical Society in San Francisco It examines current developments in non linear analysis emphasizing accretive and monotone operator theory The book presents a major survey research article on partial functional differential equations with delay and an important survey research article on approximation solvability CBSE MATHEMATICS : FOR CLASS XII - PART I DINESH KHATTAR, ANITA KHATTAR, 2009-01-30 Strictly as per the new CBSE course structure and
