Metaphor Studies: Theories, Methods, Approaches, and Future Perspectives Ilaria Rizzato, Valentina Cuccio, Aletta Gesina Dorst, 2024-12-12 Metaphor has been studied as a linguistic conceptual and communicative phenomenon in a wide range of disciplines including linguistics literary studies philosophy education political science media studies communication science psychology and neurosciences While the Cognitive Theory of Metaphor has dominated the

field since the cognitive turn in the 1980s alternatives have been proposed including the Neural Theory of Metaphor the Relevance Theory Approach the Complex Systems Approach and the Dynamic Systems Approach Though studies are still often text based there is a growing body of research on visual metaphor multimodal metaphor and gestural metaphor as well as experimental research ranging from studies on metaphor processing and comprehension to studies in NLP and machine learning Metaphor Studies is thus a highly interdisciplinary field that encompasses a myriad of theories approaches and methods In current metaphor research each of these strands is facing new challenges and offering new venues of cutting edge research using state of the art technologies Researchers tend to focus on their own research areas and provide in depth views within the scope of their own disciplines Metaphor Studies do not seem to escape this phenomenon in spite of the large number of disciplines they draw on ranging from linguistics to psychology to the theory of science Hence there seem to be little cooperation and communication across different fields methods and approaches having metaphors and figurative language as their main object of investigation This Research Topic aims to promote cross fertilization among the many research areas involved in Metaphor Studies thus bringing together different methods and perspectives and offering a comprehensive overview of the possible research scenarios

Thinking 101 Ranka Mulkern, 2009 Thinking is a blueprint for life experiences The quality of one's thinking to a large degree determines the quality of one's life It is not possible to improve life without making improvements in thinking and it is not possible to improve thinking without understanding the nature of the thinking process Thinking 101 provides a unique insight into the nature of the invisible process of thinking by offering visible models that simplify and facilitate observation and understanding of the activity of the mind that influences all aspects of human existence Thinking 101 addresses the mechanics of thinking process when individual is alone or involved in the interaction with others and suggests simple steps that lead to dramatic improvement in its quality This inevitably leads to positive changes in life The brevity of this insightful and easy to read text assures its maximum impact Years of research study experimentation and testing of various conclusions have resulted with a condensed summary that is Thinking 101 Reading it will save years of work an unaided individual would put into research and study of or into sorting through an immense amount of existing literature on this complex subject matter Thinking 101 is a gift that will keep on giving for years after it has been read
