Guía de la España mágica II Juan García Atienza,2023-10-16 Juan G Atienza

dedicó gran parte de su vida a las rutas mágicas de España visitando las aldeas más escondidas para buscar vestigios de un pasado remoto que la ciencia oficial suele menospreciar o mantener lejos de la atención general del público. En Guía de la España mágica II el autor sigue las huellas del Santo Grial por toda la geografía española. Codiciado por nobles y reyes y protegido por órdenes religiosas podemos encontrar rastros de su agitado recorrido en numerosos rincones de la Península ibérica: de la abadía de Montserrat a la catedral de Valencia, de la Basílica de San Isidoro de León al monasterio de San Juan de la Peña entre otros enclaves. También desentraña un grial más ancestral que nos remite a las mismas cavernas prehistóricas y al culto a la diosa de la fertilidad. Para completar este recorrido en pos de la España mágica Atienza nos conduce además por la ruta jacobea a través de seis increíbles itinerarios con datos, mapas e información imprescindibles pero desde un punto de vista heterodoxo, un camino mágico que revela los secretos de esa misma búsqueda de la divinidad que representa el Grial.

Historia mundial del cine I. II Gian Piero Brunetta, 2012-11-02. En su conjunto el cine estadounidense parece un territorio idílico en el que aplicar con ptimos resultados las lecciones de los historiadores de los Annales donde la historia breve y la de larga duración, la superficial y la profunda, la de los hechos y la de la mentalidad, la del imaginario y la económica pueden coexistir, sostenerse, iluminarse e incorporarse unas a otras. Los conjuntos a los que he procurado dar más valor y en torno a los que he hecho trabajar a mis colaboradores han sido los siguientes: los géneros, fundamento y estructura portante del cine estadounidense; los ritos y divos y el papel de Hollywood como fábrica de sueños; la leyenda como patrimonio y fuente de inspiración constante; la contribución fundacional de las minorías étnicas y de las múltiples raíces culturales a la construcción de una identidad sujeta a diversas transformaciones; el papel del paisaje; la interferencia de la política y las formas de presión y de control ideológico y cultural; y por último, el desarrollo de la economía, el mercado y las transformaciones de los modos de consumo desde los nickelodeones hasta la llegada de la era televisiva y los grandes éxitos de las últimas décadas. Con estas palabras sintetiza Gian Piero Brunetta el contenido y la orientación de estos dos magníficos volúmenes. Un empeño difícil dada la envergadura y complejidad de la empresa pero con un resultado incuestionable: el lector tiene entre sus manos una de las visiones de conjunto más completas y ambiciosas publicadas hasta la fecha sobre la cinematografía de los Estados Unidos, cuya consulta será ineludible para cualquiera que quiera penetrar o profundizar en la realidad de una industria que para muchos es sinónimo de cine. El segundo volumen cuenta con un capítulo de Javier H. Estrada en el que se analizan las principales tendencias del cine norteamericano en la primera década del siglo XXI.
