Arabic Logic Ibn Al Tayyib's Commentary On Porphyry's Eisagoge:

Arabic Logic, 1979-06-30 This translation of Ibn al Tayyib's work on Porphyry's Eisagoge brings to the English readers a significant book in Near Eastern logic that has been discussed and excerpted by major philosophers such as Tusi Averroes and Avicenna. It has also been the source of philosophical discussions on topics of logic by Boethius, Abelard, Ockham, and others. Gyekye has clarified the Arabic link between Greek and Latin traditions with his translation, detailed explanations, and text analysis of this 11th century philosopher's commentary on the Eisagoge, a work which is itself based on Aristotle's Categories and Metaphysics.

Avicenna, >The Healing, Logic: Isagoge< Avicenna, Silvia Di Vincenzo, 2021-04-19 This book offers a new edition with English translation and commentary of the Kitāb al-Madālī which opens Avicenna's d. 1037 most comprehensive summa of Peripatetic philosophy, namely the Kitāb al-If. For the first time the text is established together with a stemma codicum showing the genealogical relations among 34 manuscripts, the twelfth century Latin translation, and the literal quotations by Avicenna's first and second generation students. In this book Avicenna's reappraisal of Porphyry's Isagoge is examined from both a historical and a philosophical point of view. The key features of Avicenna's theory of predicables are analyzed in the General Introduction and in the Commentary, both in their own right and against the background of the Greek and Arabic exegetical tradition. Readers shall find in this book the first systematic study of the Madālī which, in addition to being the only logical work of the if ever transmitted in its entirety both in Arabic and in Latin, is crucial for understanding Avicenna's conception of universal predicables at the crossroads between logic and metaphysics.
