The Novel and the Rural Imaginary in Egypt, 1880-1985 Samah Selim, 2004-07-31 The book locates questions of languages genre textuality and canonicity within a historical and theoretical framework that foregrounds the emergence of modern nationalism in Egypt The ways in which the cultural discourses produced by twentieth century Egyptian nationalism created a space for both a hegemonic and counter hegemonic politics of language class and place that inscribed a bifurcated narrative and social geography are examined The book argues that the rupture between the village and the city contained in the Egyptian nationalism discourse is reproduced as a narrative dislocation that has continued to characterize and shape the Egyptian novel in general and the village novel in particular Reading the village novel in Egypt as a dynamic intertext that constructs modernity in a local historical and political context rather than rehearsing a simple repetition of dominant European literary critical paradigms this book offers a new approach to the construction of modern Arabic literary history as well as to theoretical questions related to the structure and role of the novel as a worldly narrative genre

Gender and the Making of Modern Medicine in Colonial Egypt Hibba Abugideiri, 2016-04-15 Gender and the Making of Modern Medicine in Colonial Egypt investigates the use of medicine as a tool of empire to serve the state building process in Egypt by the British colonial administration It argues that the colonial state effectively

transformed Egyptian medical practice and medical knowledge in ways that were decidedly gendered. On the one hand, women medical professionals who had once trained as doctresses (*hakimas*) were now restricted in their medical training and therefore saw their social status decline despite colonial modernity's promise of progress. On the other hand, the introduction of colonial medicine gendered Egyptian medicine in ways that privileged men and masculinity. Far from being totalized colonial subjects, Egyptian doctors paradoxically reappropriated aspects of Victorian science to forge an anticolonial nationalist discourse premised on the Egyptian woman as mother of the nation. By relegating Egyptian women, whether as midwives or housewives, to maternal roles in the home, colonial medicine was determinative in diminishing what control women formerly exercised over their profession, homes, and bodies through its medical dictates to care for others. By interrogating how colonial medicine was constituted, Hibba Abugideiri reveals how the rise of the modern state configured the social formation of native elites in ways directly tied to the formation of modern gender identities and gender inequalities in colonial Egypt.

Modernity in Islamic Tradition Florian Zemmin, 2018-07-23. What does it mean to be modern? This study regards the concept of society as foundational to modern self-understanding. Identifying Arabic conceptualizations of society in the journal *al-Manar*, the mouthpiece of Islamic reformism, the author shows how modernity was articulated from within an Islamic discursive tradition. The fact that the classical term *umma* was a principal term used to conceptualize modern society suggests the convergence of discursive traditions in modernity rather than a mere diffusion of European concepts.

The Arabic Print Revolution Ami Ayalon, 2016-09-26. In a brief historic moment, printing presses, publishing ventures, a periodical press, circulation networks, and a mass readership came into being all at once in the Middle East where none had previously existed, with ramifications in every sphere of the community's life. Among other outcomes, this significant change facilitated the cultural and literary movement known as the *Arab nahda* (awakening). Ayalon's book offers both students and scholars a critical inquiry into the formative phase of that shift in Arab societies. This comprehensive analysis explores the advent of printing and publishing, the formation of mass readership, and the creation of distribution channels, the vital and often overlooked nexus linking the former two processes. It considers questions of cultural and religious tradition, social norms, and relations, and concepts of education, offering a unique presentation of the emerging print culture in the Middle East.

Historical Dictionary of Egypt Arthur Goldschmidt, Jr., 2023-07-25. Egypt is the world's oldest continuous country with a recorded past of over 6,000 years. Often invaded, conquered, and occupied by foreign armies, Egypt has never lost its identity. The Egyptians of today, although they have changed their language once and their religion twice, descend mainly from the Egyptians who built the Giza Pyramids and the Temple of Karnak, who served Alexander the Great and his heirs, who submitted to Augustus Caesar and raised much of the grain that fed the Roman Empire, who started Christian monasticism, and the veneration of the Virgin Mary, and who advanced and sustained Muslim learning in what is now the world's oldest functioning university. It was and is one of the most important countries in the world. *Historical Dictionary of Egypt*, Fifth

Edition contains a chronology an introduction and an extensive bibliography The dictionary section has more than 600 cross referenced entries on important personalities as well as aspects of the country s politics economy foreign relations religion and culture This book is an excellent resource for students researchers and anyone wanting to know more about Egypt
